SUMMER QUARTER OFFERS VARIED ACADEMIC MENU

Would you like to trace your ancestral heritage? Would you enjoy scaling the mountains and sand dunes of the Pacific Northwest? Or maybe you're fascinated by the balance of nature and its struggle with modern man and his ever advancing technology. You might even like to polish your artistic skills—dancing, painting, drawing, sculpting.

If any of these activities sound inviting, Evergreen may be the place for you this summer. You can choose from three coordinated studies programs, 17 group contracts or individual contracts with 25 faculty who represent a variety of academic fields. And, for the first time in Evergreen's history, you can pay on a per credit basis from one to four units depending on the program you choose ($80 for one unit, $110 for two, $140 for three, $165 for four).

Academic Dean Byron Youtz, who is directing Summer Quarter 1974, says while more than 500 students have already enrolled for the ten-week session, openings still remain in nearly every program. Deadline for early registration is 5 p.m. today (May 31), but latecomers can also register June 21 and 24.

June 24 is the starting date for all programs except Intermedia, which begins July 10. Four visiting professors will be on hand to offer their skills. They are Norman Jacobson, professor of Political Science at the University of California at Berkeley, who will coordinate the Immigrant in America Coordinated Studies Program; Larry Gray, an assistant professor of art at Humboldt State University who will instruct the "Drawing from the Landscape Program," with current Faculty Member Marilyn Frasca; Ben Sams, a Seattle ceramic artist, and Tim Girvin, a Spokane calligrapher. Forty-nine regular Evergreen faculty members will complete the summer quarter staff.

Sign up today. As Dean Youtz says, "Jobs are scarce this summer. But, opportunities for exciting academic work—much of it out of doors—are not." A complete Summer schedule is available at the Admissions Office.

FACULTY PLANS FINAL WORK WEEK JUNE 10-14

Identifying Evergreen problems and figuring out solutions to them will occupy most of June 10-14 for Evergreen's 112 faculty members. Designated "faculty work week" the five-day period will encourage faculty members to "identify problems that most need to
be worked on, to work on them either in a task force or alone, and to produce short position papers by the end of the week..."according to a recent memo sent to all faculty by the Planning Group.

The plan calls for all interested faculty to travel to Fort Worden and spend June 10, 11 and 12 defining and working on problems, as well as enjoying some relaxing time to celebrate the end of Evergreen's third academic year. Once faculty members return, they'll be asked to move into their new room assignments and to prepare position papers which will be delivered June 14 to the four academic deans and Provost Ed Kormondy. The week will be topped off with an afternoon picnic for all faculty, their families and friends.

LIDMAN TO JOIN FALL FACULTY

Lidman, a former professor of economics at Oberlin College, served as a staff member of the University of Wisconsin's Institute for Research on Poverty. He also established the North Carolina office for the Rural Income Maintenance Experiment in 1969 following research work with Dr. D. Lee Bawden.

Lidman earned his bachelor of science degree in electrical engineering from Cornell University, his master's degree in public administration from Princeton University, and both his master's degree and doctorate in economics from the University of Wisconsin at Madison.

FINAL GRADUATION CEREMONY SCHEDULE ANNOUNCED

The Graduation DTF has finalized the schedule for the June 2 commencement celebration. Evergreeners and their guests are encouraged to arrive on campus by 1 p.m. to enjoy the academic fair and senior exhibitions. The actual commencement ceremony will be held at 2 p.m. featuring Faculty Members Andrew Hanfman and Maxne Mimms.

A giant potluck will follow at 3 p.m. Everyone is invited to bring cold dishes (bread, cheeses, salads, etc.) and deliver their dishes to the main table before the 2 p.m. ceremony. An hour or more of performances, beginning at 4 o'clock and featuring graduating musicians, will top off the half-day celebration, which will take place on the central campus plaza weather permitting. If the rains come, the ceremony will be held in the main Library lobby.

OLYMPIA TEACHERS AND EVERGREENERS PARTICIPATE IN NSF STUDY

Thirty-one teachers from the Olympia Public Schools and 11 Evergreen students have been selected to participate in a National Science Foundation-sponsored curriculum workshop in elementary school science to be held at Evergreen June 17-28.

The interaction workshop, a cooperative venture between Evergreen and the Olympia School District, is a prelude to the introduction of Science Curriculum Improvement Study materials into grades 4, 5, and 6 of the Olympia schools next year, according to Don Humphrey, Evergreen faculty member and director of the project. Floyd Smith, science coordinator for the Olympia Public Schools, will serve as primary instructor in the program, joined by specialists from Evergreen, the Olympia School District and the University of Puget Sound.

Together, Olympia teachers and Evergreen students will strive to implement the new curricular materials, which Humphrey hopes will provide "more interesting and challenging science learning opportunities for the youngsters in the Olympia area." Olympia teachers who plan to participate in the sessions are from the following elementary schools: L.P. Brown, Garfield, McLane, Roosevelt, Rogers, McKinley, Lincoln, Madison and Pioneer.

Evergreen students selected to participate in the program are: Gordon Boe, Salem, Ore.; Pam Churchill, Allyn, Wa.; Andrea Dashe, La Jolla, Ca.; Pamela Farr, Kirkland; Bruce Honig, Encino, Ca.; Elizabeth Kenney, Little Compton, R.I.; John Kenyon, Santa Barbara, Ca.;
CONTRACTED STUDIES STUDENTS FACE NEW REGULATIONS EFFECTIVE SUMMER QUARTER

All students planning to enroll for contracted studies Summer Quarter are reminded that they must file not only a learning Contract but an Internship Agreement. The new requirement, which goes into effect for Summer Quarter and will apply to all subsequent quarters, also requires that all students signed up for contracted studies must clear their learning contracts with the Office of Cooperative Education before the agreements can be submitted to the Registrar.

The new regulations urge students to "whenever possible bring both the completed Contract and the completed Internship Agreement to the Co-op Office. Co-op will note on the contract that an I.A. has been filed and send the Contract on to the Registrar."

Students seeking extensions of their Internship Agreements are asked to see a Co-op Coordinator. If extensions are granted, they will be noted on the students' contracts and sent on to the Registrar.

Students who have completed an I.A., but not their contract, can turn in the I.A. only—but they must file a contract before June 28 and it must be cleared through the Co-op Office.

One final reminder: today is the deadline for registration in summer contracts and a $25 tuition advance is due by 5 p.m.

PAVILION OPEN ONLY TO EVERGREENERS

Hoping to clarify misunderstandings which can lead to conflicts between Evergreeners and Olympia-area residents, Director of Recreation and Campus Activities Pete Steilberg has issued a reminder to students, faculty, and staff that facilities in the covered campus Recreation Pavilion are not available for public reservation. Steilberg says some community members have been led to believe, perhaps inadvertently by Evergreen friends, that the pavilion and particularly the two tennis courts are available for public use at any time.

"This is not the case," Steilberg says. "I hope that Evergreeners who are asked by local residents about using the pavilion will keep our policies in mind. Because facilities are limited and the demand by Evergreeners so great, the building is not available for public reservation. Regularly-scheduled college programs take precedence over all uses of the pavilion. College students, staff, and faculty—as individuals—have next call on use of the facility."

Steilberg points out that public use of the building is possible, within limitations. Guests of Evergreeners may utilize the pavilion if their sponsors are present and using it with them. "Otherwise, community residents who just drop in to use the pavilion are obliged to halt their activities if a regularly-scheduled college program is going on at the same time or if requested to do so by an Evergreener."

STUDENT INJURED IN FALL FROM LIBRARY

William Bradshaw, a 19-year-old Walla Walla student, suffered "multiple fractures and a concussion" in a fall from the fourth story of the Library Tuesday night. Bradshaw, a freshman enrolled in the Nature and Society Coordinated Studies program, was listed in "fair" condition at St. Peter Hospital Wednesday morning.

McLane Fire Department officials who handled the emergency said it was remarkable that the student survived the fall, which ended on the bricks in front of Student Services offices.

The Evergreen freshman is a graduate of Walla Walla High School and the son of Mr. and Mrs. Harold Bradshaw, Route 4, Walla Walla. The circumstances surrounding his fall are still under investigation by campus security.
SORRY ABOUT THAT!

Last week's issue of Newsletter listed those students expected to participate in the June 2 commencement ceremony. Student Joanne Kingsbury of Gig Harbor, Washington was inadvertently listed as a resident of Indiana. Don't ask how it happened, but, to Joanne, our apologies!

EVERGREENERS IN THE NEWS

Bookstore Manager Doris McCarty has been named to the Book Selection Committee of the National Association of College Stores. She will examine matters related to stock control, book promotions, mass marketing of paperbacks and other areas related to purchase, sales and evaluations of books...

Presidential Assistant Jim Sainsbury, who joined the Evergreen team last fall as a legislative aid to President Charles McCann, has resigned effective May 31. Also resigned are Patty Baker, accounting assistant in Students Accounts, whose last work day is today and Niki Smith, former program secretary and most recently a part-time clerk typist in the Personnel Office. Niki and her husband Larry are "leaving for the sun" of California where both of them plan to teach in San Jose next fall.

Evergreen's filmmakers Frankie Foster and Richard Speer have scored again---this time with an invitation to participate in the Seventh Motion Picture Seminar of the Pacific Northwest to be held in Seattle June 7 and 8. The two will discuss "Computer Filmmaking: Methods and Uses" in the opening session June 7.

...Academic Dean Lynn Patterson returned May 21 from a three-day trip to Spokane where she attended the first in a series of international symposia planned to coincide with the EXPO '74 World Fair. She participated in discussions on the "Dilemma Facing Humanity" and moderated discussions on the viewpoints of the perservationists at the symposium which is staffed by the International Symposia Task Force under direction of the National Advisory Committee on Environmental Programs. Ms. Patterson said she also had time to explore the newly opened world's fair which, she said, "has nothing whatever to do with environmental issues." She said the day she toured the fair was cloudy and rainy, yet packed exhibits and long lines awaited her at every turn. She also indicated that two more symposia are planned by the international staff: one this weekend on energy and another June 19-21 on population.

Faculty Member Susan Brenner was released from Group Health Hospital in Seattle May 21 following brain surgery. According to Faculty Member Paul Sparks, Ms. Brenner was in "good spirits" and "very cheerful."

Darrel Six, maintenance technician, will be promoted to an engineering assistant June 1...President Charles McCann returned May 29 from a sailing trip to Victoria. He raced his vessel, the Nina Del Rey, over the past weekend and enjoyed a leisurely sail home accompanied by his wife, Barbara.

STUDENTS SOUGHT TO HELP WITH BUDGET

Students interested in contributing to the budgeting process for the 1975-77 biennium are invited to contact Bonnie Hilts, Library 1217 (866-6296) as soon as possible. Ms. Hilts says it's that time of year again---time for administrators, faculty and staff to begin the time-consuming, nerve-fraying process of preparing for the next two-year budget, and that student input would be a valuable asset for the budgeters. She emphasizes, however, that only those students who plan to be on campus throughout the summer should volunteer, since the bulk of the budget work will be accomplished during the 10-week summer session.
U.S. FOREST SERVICE AWARDS HERMAN $24,000 GRANT

The U.S. Forest Service has awarded a $24,000 grant to Evergreen Faculty Member Steve Herman, a biologist, for conducting a study to determine the effectiveness of various chemical insecticides — including DDT — against the Douglas Fir Tussock Moth. The grant, effective immediately, runs through June 30, 1975, when a final report will be presented to the sponsoring Pacific Southwest Forest and Range Experiment Station at Berkeley, California. Herman will serve as principal investigator for the research project, along with Dr. Carroll Williams, a Forest Service scientist based at Berkeley.

Infestation of the Douglas Fir Tussock Moth in Eastern Washington and Eastern Oregon forests and resulting proposals to control the insect through use of DDT have resulted in a running controversy among public and private agencies and individuals throughout the Pacific Northwest. "The primary purpose of the study supported by the grant is to evaluate insecticides with an eye toward identifying a chemical that can be used against the insect but which is less harmful to the environment than DDT," Herman said. "DDT has been essentially banned and the federal Environmental Protection Agency is anxious to avoid situations similar to the one this year in which they've had to authorize limited use of the chemical against Tussock Moth infestation."

Herman said that personnel working on the project will include primarily students from Evergreen's Ecology and Chemistry of Pollution Coordinated Studies program. "The students were selected by the forest service, primarily because of their acquaintance with the insect and the overall problem in Eastern Washington and Eastern Oregon forests," he added. "Throughout the current academic year, program participants have cooperated closely with a number of governmental agencies in researching problems associated with the insect infestation."

The 12 student researchers will report to the field — an area south of LaGrande, Oregon, in the Wallowa-Whitman National Forest — about June 10. Their activities will continue through the 1974-75 academic year as part of the two-year Ecology and Chemistry of Pollution program.

Program participants during the next academic year also will continue working on a study they've initiated to study pollution in Puget Sound, particularly with regard to the effects of oil spills on aquatic organisms; work on an evaluation of the effects of DDT on animals, birds, and insects where spraying has been undertaken to control the Tussock Moth; and design individual research projects which will culminate in the publication of a series of senior theses.

ENERGY CONSERVATION RESULTS REPORTED

Director of Facilities Jerry Schillinger reports that, through April, an energy conservation program at Evergreen has resulted in a 26.5 percent reduction in electrical consumption, compared to usage for a comparable period during the 1972-73 academic year. The conservation program had a ten percent reduction target mandated last Fall by Governor Daniel J. Evans. Evergreen had already undertaken electrical conservation measures last year but intensified them after the governor's directive was issued.

The overall 26.5 percent reduction for the period from September through April was accomplished despite the addition of new physical facilities to the campus, coupled with increased student enrollment. Electrical consumption reductions ranged from 16 percent in October to as much as 35.9 percent in February.

YOGA COURSE OFFERED THIS SUMMER

A ten-week course in Yoga will be offered June 26 through August 30 at Evergreen under sponsorship of Counseling Services. Cost of the course is $20 per participant. Both beginning and intermediate classes will be available. Enrollment is limited to 20 persons so interested participants should contact Secretary Patty Allen, Library 1220 or call 866-6151.
