

continued from cover

The three-day conference, coordinated by MPA political scientist Dr. Kenneth Dolbeare, sought to "focus public attention on economic issues facing this state and to start the process of developing creative and effective means for desirable, long-term economic development."

More than 200 persons attended lectures, panel dis-

ideological underpinnings of contemporary American society, and discuss the impact of an individual's values on his or her behavior. They also require students to examine the legal and moral responsibilities of those in public service.

Students are also encouraged to participate in off-campus internships, like

Karen Tvedt

Dr. Ken Dolbeare, MPA faculty member and conference coordinator.

Suzanne Shaw

"We've created a rigorous, professional program that reflects Evergreen's commitment to interdisciplinary studies and to public services."

cussions and workshops aimed at exploring potential economic innovations and examining ways to finance economic growth, means to coordinate state and local planning needs, and methods to identify educational and training requirements necessary to achieve a revitalized state economy.

The conference represents a small portion of the efforts being extended by the college's first graduate program to not only help solve today's critical problems, but to better prepare students and citizens to undertake the challenges that lie ahead.

As Program Director Dr. Russ Lidman explains it, Evergreen's graduate study began three years ago to help the college meet one of its three major goals: service to the state government.

"We've created a rigorous, professional education for students engaged in or intending to pursue careers in government or in organizations involved with public issues.

Chief goal of the MPA program, Lidman continues, "is to equip students with the background and skills required to assume responsibilities in the public sector."

More than 70 men and women are currently enrolled, including 10 from the "first 40" who launched the program in September 1980. Ranging in age from 25 to 54, 70 percent of those enrolled are currently working in state or local government and nearly all are attending classes part-time, seeking to complete their required 60 hours of academic credit in six to eight quarters.

Uniting the 70 with their faculty team is a commitment to achieve very specific academic goals.

"We insist that our students learn such practical skills as the ability to write analytical essays, advance persuasive arguments, write clear, concise memos, and explain complicated fiscal or economic data," he says.

"We also require them to learn how to deliver effective oral presentations, to clearly communicate statistical information and to accurately interpret positions of contending parties."

MPA faculty are also devoted to helping students understand the historic development of governmental and public service. They encourage students to explore the limits and strengths of government, study the

the one Linda Merriman completed last spring in the office of U.S. Senator Slade Gorton in Washington, D.C. And, they're able to take advantage of two other programs now sponsored by MPA: "short courses" and the Career Executive Training Program.

Launched this fall, short courses are designed for public managers and offered during evenings and on Saturdays. Two are usually offered each quarter to "convey practical information in a compact form," says Lidman.

This quarter, for example, MPA will offer courses on regional economic development and on the social security system and other policy issues affecting senior citizens.

Simultaneously, MPA faculty and others from Evergreen will continue hosting a Career Executive Training Program, which by year's end will involve more than 175 of the state's top managers. The program, funded by the Employee Development and Training Division with the State Department of Personnel, is part of a legislatively-approved state-wide effort to provide opportunities for persons who have been designated by their agencies as career executives.

The benefits of both the short courses and the Career program go beyond those gained by enrolled participants, explains Lidman.

"They enable our faculty to work directly with the state's top managers and develop a better understanding of the real problems they encounter daily," he says. "The end result is that for us, the line between theory and practice evaporates altogether."

The MPA program has also led to Evergreen's involvement in a variety of local projects, ranging from a study of services for local Indochinese refugees to a survey of citizens attitudes toward city government in Olympia.

All these activities further strengthen Evergreen's ties to state government and better enable the college to achieve MPA's primary goal: better preparing students to seek solutions to challenges facing this state and region—not only during the trouble-burdened Forty-eighth legislative session, but in the decades to come.

Graduate Four Find MPA "Tough, Stimulating Challenge"

They seem, at first glance an unlikely quartet: a single mother of three who commutes twice a week from Aberdeen, an Olympia scientist/research analyst, a former Fisheries patrol officer, and an exchange student from Japan.

But Karen Tvedt, Ken Conte, Suzanne Shaw and Ginn Kitaoka have, during the past several months, shared one strong common bond: enrollment in Evergreen's masters degree program in public administration.

Karen, who lives in Aberdeen and works for Children's Services there, arrives on campus two evenings a week. Ken has just completed his degree and begun a new job with the State House of Representatives. Suzanne, an Evergreen graduate, was laid off her state job last December and spent most of 1982 studying and looking for another job. And Ginn has been sent to Washington by his home government in Japan to study organization and management.

Like most of their colleagues, the four are all in their 20s or 30s, three are enrolled part-time, and all have chosen Evergreen's graduate program as the best route to pursue a career in public management. But, each chose MPA for different reasons.

For Karen, the decision to return to school was prompted by stagnation more than anything else.

"My life began to seem so limited," the former Highline Community College teacher explains. "I was devoting all my time to working and taking care of the family—nothing much else. I wanted personal growth—a chance to learn some new things."

Ken wanted to explore a different career path. The 1972 graduate of North Thurston High School had been working in the sciences his undergraduate days at the University of Washington.

"I decided I didn't want to spend the rest of my life as a scientist," he says. "I've always had an interest in politics and public administration and wanted to pursue that a bit."

For Suzanne the decision came in part from the uneasy premonition that her job might disappear. "I also wanted to advance my career in state government and felt that the graduate program would help me achieve that—and perhaps protect me from future cuts."

Ken Conte

As she expected, her job as a hearings officer for the Department of Fisheries was cut in December of 1981—but by then she was already enrolled and on her way.

Ginn had completed his bachelor's degree in economics at Kobe University in Japan before he arrived on Evergreen's campus in the fall of 1981. A government employee of the Hyogo Prefecture, he came to study comparisons and contrasts between Japanese and American styles of management, particularly at the state and prefecture levels.

For each of the MPA quartet, the new path was proved both demanding and surprising.

Karen, a seasoned veteran at juggling the demands of career, family and education, commutes four hours a week at night alone to attend her MPA classes. She "al-

By Judy McNickle

ways needs" more time and energy" and she's not sure what the end results will be.

"I do know I've never worked harder in school than I'm doing now," she laughs.

What surprised the determined student was the change in direction prompted by her classes and her exposure to what she calls "the finest faculty I've ever run into."

"I came here thinking I knew what I wanted—a career in management with the department where I work. Now I'm far less certain," she says. "I've become very interested in political organizations and think I'd like to become involved in some grass roots efforts to affect change."

Ken never had been "that pleased with traditional education," so he came to Evergreen seeking an alternative.

"I found a real gem," he says. "I've been very pleased with the faculty, the size of our classes, and the quality of education I got."

That despite the fact that the program "covered lots of materials and was very rigorous and time consuming"—so much so that on several occasions he had to take leave without pay to complete his studies on time.

One result of all his effort: a 200-page report on the history of state-owned tidelands and shorelands.

"I've researched why the state began selling these lands, why it stopped selling them in 1971, and why it's reconsidering the sales again," he reports. "I think the study will be a valuable resource to the Department (of Natural Resources) as well as for others in state land management."

Suzanne's biggest surprise when she enrolled in her alma mater to resume her education was what it did to her social life.

"I had to completely clear my calendars of all social and volunteer commit-

continued on page 2

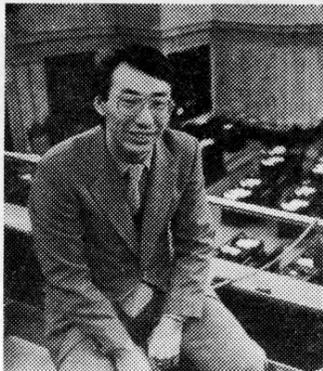

MPA Students

continued from page 1

ments—and put my television in the closet,” she says “At first I spent nearly all my time trying to readjust and get back in the academic groove.” Now, she adds, she’s found “a way to balance my time a bit better.”

Interfering with those activities are the demand of her new job—as a paralegal staff member in the State Attorney General’s Office. Suzanne’s three-year assignment deals with a 30-million-dollar lawsuit over construction of six new ferries. Because her job has been so demanding, Suzanne did not reenroll Winter Quarter, but intends to complete her degree in the spring.

Along with it, she’ll finish her MPA project: a study of the socialization of

Ginn Kitaoka

women into nontraditional jobs—particularly in law enforcement, a field in which Suzanne can apply her experience as a former fisheries patrol officer for the state.

For Ginn, the MPA program and his two-year visit to Washington “has been surprising in the lack of surprises.”

But, he notes, “everything here is fun”: the classes, his studies and his involvement in the college’s first Tribute to Japan, held January 16 (see page 4).

But for Ginn, the most valuable experience has been his internship with the Department of Commerce and Economic Development.

“It’s very useful,” he comments. “It’s given me a sense of the atmosphere and system of organization here that is very different from what is found in Japanese governmental agencies.”

Internships are not common in Japan where, he says, everyone “has to start at the bottom of the ladder” after they complete their college degree.

“Each person has to work his way up,” he adds. “Even the president of Honda began as a blue collar worker and slowly progressed through the company.”

Ginn thinks the internship idea may become popular in Japan in the future since it is “a very important and practical learning experience.”

All the benefits shared by these four MPA students are not directly tied to their formal education as Suzanne points out.

“Without the MPA program, I’d have been in a much worse situation personally when I lost my job,” Suzanne says. “MPA helped me develop self confidence, broaden my horizon and provided me with a built-in support group and a much better job network,” she adds.

“Our students really do watch out for each other.”

Childbirth, Insecticide, and Cleaning Up History—Evergreen Authors Reshape the World

by Mark Clemens

Unlike many universities and colleges, Evergreen does not have a “publish or perish” rule. Faculty members are free to put their writing into print as often as they can, or not at all.

Despite this, there are a surprising number of faculty, and staff, who have written books on a wide range of subjects. Three authors who have written the most recent books of note are faculty sociologist William Ray Arney, Academic Dean John Perkins, and faculty historian Susan Strasser.

Hottest off the press is Arney’s **Power and the Profession of Obstetrics** (University of Chicago, 1982) which seeks to “lay bare the nature of obstetrical power, how it was acquired, and how it changed.” To do so, Arney, who was director of evaluation for the Regional Perinatal Program in Vermont and New Hampshire for three years, traces a path between two histories of the profession—one written by obstetricians and the other by feminist scholars.

“The profession argues that knowledge and technology benefit women, babies, and society generally,” Arney writes, “critics argue that increased technology and an expanded knowledge base medicalize pregnancy and birth to the detriment of women’s experiences and families’ freedoms during a period of life that

need not be treated as a medical problem.”

Arney offers a new, third view: that the introduction of social alternatives and technical monitoring schemes since World War II has changed the relationship between obstetricians and women.

John Perkins is also concerned with the impact of technology since World War II in his book, **Insects, Experts, and the Insecticide Crisis** (Plenum, 1982), an analysis of how economic entomologists have dealt with the overuse of chemicals in insect control.

Perkins’s interest in the subject began in the early 1970’s when public controversy over the use of insecticides was raging, as were two factions in the entomological profession over which alternatives to chemical control should be used.

“I couldn’t figure out for the life of me why the two parties were arguing,” says Perkins, who at the time worked with the National Academy of Scientists, which provided a forum for the debate.

By analyzing the situation in a total cultural context, Perkins reveals that the internal disagreement was, in fact, heavily influenced by outside factors.

“I wanted to show,” he says, “how social, economic, political, and intellectual forces shaped the expert knowledge of entomologists and farmers.”

Susan Strasser uses a similar total approach in her authoritative work, **Never Done: A History of American Housework** (Pantheon, 1982).

“I was interested in the role of the individual in the capitalist system, and the way industrialism has affected daily life,” she says. “Housework was one angle on that, and I tried to write a book that would be interesting to a lot of people.”

The first complete history of housework and the American housewife, **Never Done** has since been critically acclaimed in newspaper reviews from coast-to-coast, including *The Nation*, *The New Yorker*, *Ms. Magazine*, and the *Los Angeles Times Book Review*. All this praise is well deserved because Strasser’s book is the culmination of 14 years of work, beginning when she was an undergraduate at Reed College in Portland.

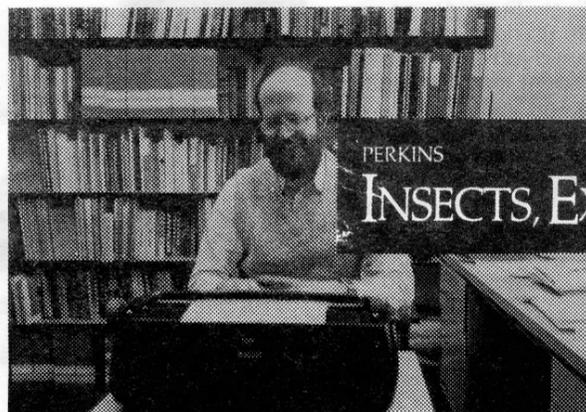

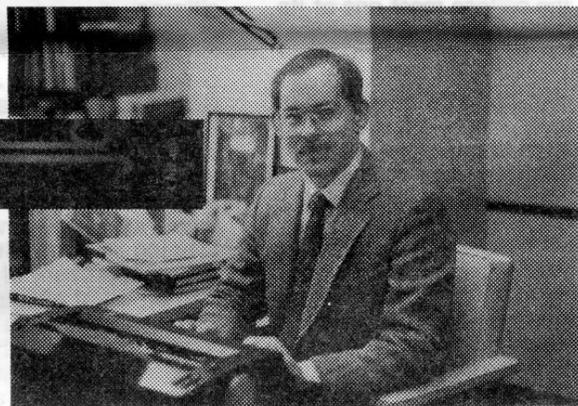

“Originally, I was interested in the literature of advice to American women during the mid-nineteenth century,” says Strasser, who teaches American history and labor studies, “but in studying cookbooks, etiquette books, women’s magazines, and household manuals, I discovered I wanted to know what women did, not merely what they were told to do.”

None of these authors has any easy answers to the questions they raise. Arney offers no vision for the future of relationships between obstetricians and women, only his view that the structure of power that surrounds childbirth has changed. Perkins concludes that “if resolution of the insecticide crisis is to come, it will occur primarily in the fields of values and politics.” Strasser’s shows how many of the tasks of housework have become market commodities, of big corporations, launching the housewife into the work force and changing women’s daily roles forever, but her final perspective is that families will retain control of their lives only with the “recognition that private life and public decision-making are and always have been linked.”

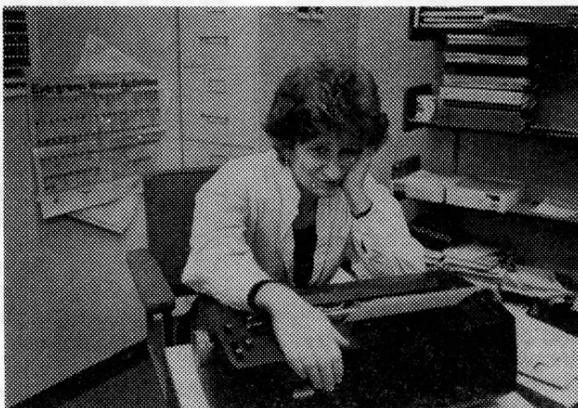

Footnote

A comprehensive bibliography of authors at Evergreen, from Guy Adams to Ron Woodbury and others, is being compiled presently and will be made available to alumni and any other interested parties upon completion. If you would like to have a copy, send your name and address to the Office of College Relations, Library 3114, The Evergreen State College, Olympia, Washington 98505.

Sports Update: Tallman to Nationals; Sailors Finish Second in Windjammer

The Geoduck winter sports seasons are underway and there is already cause for celebration.

Evetree Tallman, swimming for the women's intercollegiate team, has qualified for the NAIA nationals in the 50, 100, 200, 500, and 1,000 yard freestyle events. Swimming for the men, Austin St. John, who qualified for the nationals last year is just two-tenths of a second from gaining a berth at this year's national competition in Arkansas. Another member of the women's team, MaryBeth Berney, is within seconds of qualifying in the 100 and 200 yard intermediate, plus the 50 freestyle.

"Along with Evetree, MaryBeth, and Austin, Evergreen has some other hopefuls," says Swim Coach Robbie Johnson. "I am pleased with the team's per-

formance, but we have a number of important meets coming up in February."

Evergreen swim buffs have an additional reason to be excited: the Evergreen pool will have an electronic timing system installed at the end of January. Jan Lambertz, Director of Recreation and Athletics, comments that, "This new addition to the pool will make an already beautiful facility extremely efficient and accurate for the timing of high school and college meets."

Another success story is the Evergreen sailing team, coached by Lou Powers. "We took first place in our own Evergreen Regatta in November and came in second to the University of Washington in the Windjammer Eliminations Regatta, here in Olympia, January 15 and 16," remarks Lou.

The Geoduck's A Fleet was manned by Eric Noyd and Gordon Smith, for the Windjammer (although there was precious little wind to jam), and the B Fleet by Rick Baldwin and Jamie Stewart. A crowd of nearly 70, including competitors, Evergreeners, and members of the community, gathered at the Organic Farmhouse on Saturday evening of the Regatta weekend to watch sailing films and videotapes.

The 1983 tennis season begins in February and both the men's and women's teams are practicing now at Tumwater Valley Racquet Club under the direction of Coach Alice Parsons.

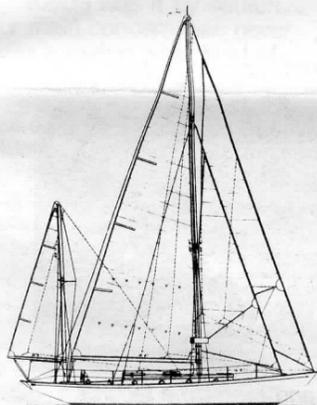

There have been some encouraging developments in club sports at Evergreen this year. Twenty men, enough to form two recreation basketball teams, have been com-

peting in Olympia city leagues on Tuesdays and Thursdays since mid-December. Competition is fierce and, despite some close games, both teams are winless. The women's basketball team began its league competition in January, and dropped its first two games, one of those a four-point loss in the opener. There are two coed volleyball teams this winter, a new addition to the activities offered through club sports.

"The sports program at Evergreen has really grown this year in the number of interested people participating," says Sandy Butler, Assistant Director of Athletics, "and the Geoduck sports teams are respected within the community for their level of competition."

From Fiddlehead to Storage Yard: Geoduck Fleet Afloat and Growing

Remodeling plan for
Evergreen 44's

As befits a college that borders an arm of the Pacific, Evergreen possesses more than 30 Geoduck vessels to transport students, faculty and staff on academic, athletic and recreational voyages. This fleet has grown through hard work, careful budgeting and the generous donations of private citizens, and promises to continue its growth in the future.

A third of the fleet can be seen anytime Evergreen hosts a regatta, as was recently the case at the Windjammer Eliminations (see "Sports Update") in Olympia in mid-January.

Crisscrossing Budd Inlet at the command of the racing teams were Evergreen's sleek Alphas. The school purchased six of the 14-foot sailing dinghies in 1981, added another last year, and hopes to continue making additions as needed.

Three other boats were involved in the Regatta; a committee boat, a chase boat and the flagship of Evergreen's fleet, the Seawulff, which served as an observation boat. Commissioned in 1981 after six years of work

by Evergreeners and community members, the 38-foot Seawulff is a shining example of what contributions of time, materials and money can do.

A 14-foot aluminum Lund skiff, one of three Evergreen uses for academic trips, served as the chase boat, darting between Fiddlehead Marina, the Seawulff and the committee boat, "Mr. Ed."

So-dubbed for its former owner, Ed Hagwell of Olympia, Mr. Ed is an 18-foot wooden inboard motorboat that was built in 1947. Hagwell donated the craft to Evergreen, then helped renovate it and tune the engine, an eight-cylinder Dodge flathead that tops 30 knots. With a fresh coat of red paint, Mr. Ed now provides extra safety and transportation for regattas as well as serving as the official committee boat.

Another contributor to the college is Hank Heinrich, also of Olympia and member of Evergreen's athletic booster club, the Clambackers. Heinrich gave the college a 14-foot C-lark sailing dinghy which is used mainly as a rental, and presently getting a mast

repaired and new paint job from Coach Lou Powers.

Rivaling the Seawulff for beauty in its own small way is a pilot gig which was built by students several years ago. A sailing rowboat with beautiful, lapstrake shipping, the pilot gig is used only for special occasions such as Olympia's annual Wooden Boat Show in May.

An inventory of the rest of Evergreen's fleet reveals two inflatable boats, two rafts, four whitewater kayaks and eight canoes, including four new 17-foot Easyriders. There are also the 44's, two boats tucked away in Facilities' storage yard that could have more potential than anything Evergreen currently puts in the water.

Acquired by Evergreen from federal surplus in 1979, The Resolute and The Flirt are 44-foot wooden sailing yawls which were built in 1939 for the U.S. Naval Academy to train midshipmen in racing and teamwork.

An estimated \$95,000 is needed to repair the yawls—\$44,000 for The Resolute alone—but plans to seek gift funds for the 44's Project are

underway. Thanks to an initial \$2500 grant from Tacoma BoatBuilding, Don Fassett, a retired engineer who worked long and hard on the Seawulff, is already beginning to restore the mahogany hull and the deck of The Resolute.

College officials hope both yawls can be repaired enough to be taken out of dry dock and refloated where final restoration can take place. Once that's accomplished, the Resolute and The Flirt will accompany the Seawulff on academic voyages, serve as charters to bring in revenue and defray operating costs, and race in regattas around Puget Sound, making Evergreen's fleet one of the most impressive in the Northwest.

Individuals who are interested in making donations of cash, labor, or materials to the 44's Project, or any other part of Evergreen's fleet, should contact the Development Office at Evergreen at 866-6000, ext. 6565.

S&H Lecture Series to Focus on Religion and Public Policy

The relationship between religion and public policy will be examined by visiting scholars in a series of lectures at The Evergreen State College this spring.

To fund the series, "Religion and Public Policy in American Culture," Evergreen was selected as one of 29 colleges to receive a \$2500 grant from the S&H Foundation, which is sponsored by the Sperry and Hutchinson Company. The Foundation started the lectureship program in 1960 to enable colleges and universities to bring eminent

scholars to the attention of their students, and also help establish closer ties with their local communities.

"Religious revival," says Academic Dean John H. Perkins, who will coordinate the lectures, "has been a recurring event in American history. Currently the nation is in such a period. This revival may fade over time, but its effects on American life will linger for years."

Perkins notes that public policy always reflects values in a society. "It is important," he says, "for the colleges and universities of the country to examine the changes currently underway."

The lecture series will feature three speakers during Spring Quarter, 1983. Each evening at 8 p.m. in the Recital Hall of the Communications Building, and all alumni are cordially invited to attend.

In the first talk, April 5, Professor Robert N. Bellah of the University of California, Berkeley, will speak on "Religion and Politics in America."

Bellah is a distinguished scholar with scores of well-received publications who has taught at Harvard and

Princeton Universities and served as a research fellow at Stanford University and in Japan. He is currently Ford Professor of Sociology and Comparative Studies, and Chairman of the Department of Sociology at Berkeley.

Bellah's talk will set the general stage for the lectureship series. "Although the United States constitution prohibits the establishment of religion," he says, "religious convictions have had an influence on our political life throughout our history. Abolitionism, the social gospel, opposition to the teaching of evolution, and the civil rights movement are examples. At present, we see groups such as the Moral Majority attempting to influence social legislation. We also see a number of religious bodies deeply involved in the movement for a nuclear freeze."

Professor Bellah will give an overview of the role of religion in our political life. He will also comment on where religious influence is appropriate and where it is not.

Religion and contemporary science provide the subject for a second lecture

on May 17 when Professor Ronald L. Numbers of the University of Wisconsin speaks on "Creationism in 20th Century America."

Professor Numbers serves in the Departments of the History of Medicine and the History of Science on the Madison campus in Wisconsin. Among his many honors, he is on the editorial advisory board of the journal *ISIS*, published by the History of Science Society.

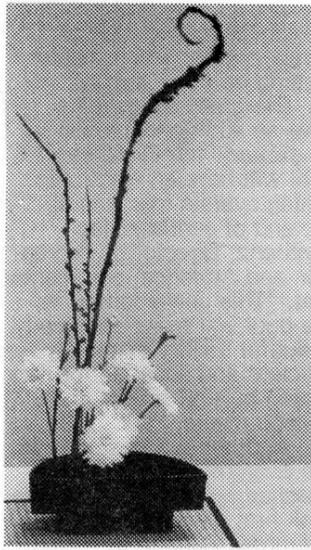

Professor Numbers will explore how the American people have reacted to the teaching of evolution during the past 80 years. Even today in an America that is a wonder of advanced science and technology, it is not clear whether the majority of citizens believe Darwin's 1859 explanation of the origin of species is the best one available. The biblical story of creation in Genesis has powerful appeal for many, even among the scientifically educated.

Professor Numbers will explore this apparent contradiction and show how the arguments against teaching evolution in the public schools have changed through the years.

Religion and the rights of Native American people will be the subject of the final lecture in the series. Dean Perkins has been working closely with faculty members David Whitener, Gail Tremblay, Lloyd Colfax, and Betty Kutter to identify a speaker.

"We have identified four or five exciting possibilities for an Indian lecturer on this subject," says Perkins. "In many ways, this lecture will be the most important of the series. Spiritual beliefs were highly important to Indian peoples, and European settlement of North America severely hindered the abilities of Indians to practice their traditional beliefs. The speaker brought in for this talk will be a vital contribution to the efforts of Indians in western Washington to preserve and celebrate their ancient rites. It will also be an important opportunity for non-Indians to learn about the subject."

For more information and a descriptive brochure, contact the Office of College Relations (866-6000, ext. 6128) or John Perkins' office (866-6000, ext. 6870).

tribute to Japan

Celebrating Japanese Connections

More than a thousand visitors flocked to Evergreen January 16 to help the college host its first "Tribute to Japan," a half-day celebration jam-packed with performances by Japanese dancers, demonstrations of Japanese crafts, films, exhibits, slide/talks, lectures and traditional Japanese delicacies.

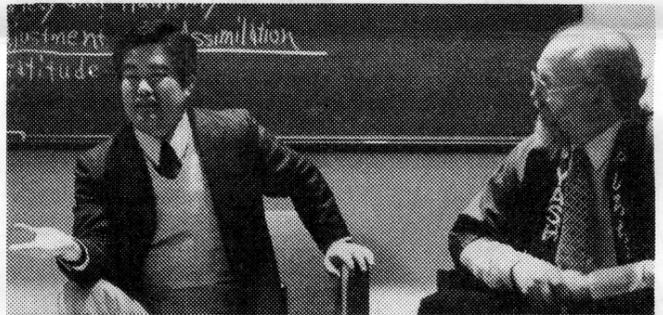

Cosponsored by the Consulate General of Japan based in Seattle, the Tribute highlighted both the special ties Evergreen has long enjoyed with her sister institution, the Kobe University of Commerce, and the relations between Olympia and its sister city, Yashiro.

The college's academic connections with Japan were spotlighted when three exchange professors offered a joint discussion on the "creativity of modern Japan." Evergreen faculty members Richard Alexander and Tom Rainey both of whom have taught in Kobe, shared the speaker's podium along with visiting professor Mitsuharu Mitsui, who has been teaching at Evergreen from Kobe during Fall and Winter Quarters.

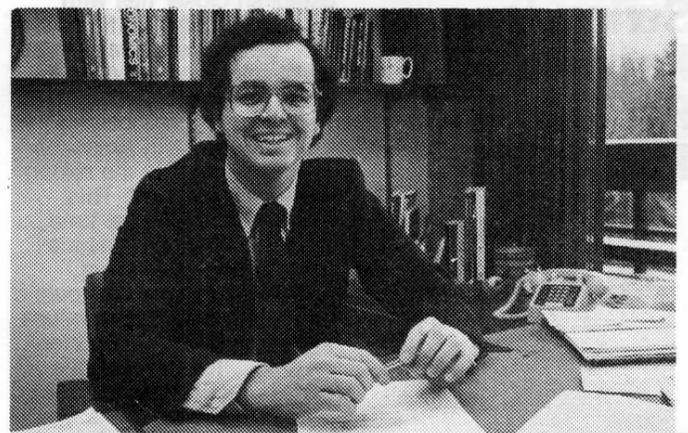

Faculty art historian Kazuhiro Kawasaki offered a slide/talk on contemporary masters in Japanese crafts, complemented by an exhibit of Japanese prints, and demonstrations of origami, calligraphy, and flower arranging by local Japanese artists.

Throughout the day, as hungry guests devoured trays full of sushi and other Japanese treats, dancers from the Puget Sound area offered lively and authentic performances, films loaned by the Consulate General were shown, and traditional tea ceremonies were conducted before standing-room-only audiences.

Reactions to the Tribute were unanimously enthusiastic; Save a space in your January 1984 calendar; an encore may well be in the offing.

Visiting faculty Mitsuharu Mitsui and long-time faculty Richard Alexander discussing creativity.

Alum To Replace Eldridge

Evergreen graduate Stan Marshburn has been named new assistant to President Dan Evans. He assumes responsibilities for Evergreen's legislative relations and on-campus governance, duties formerly held by Les Eldridge, who moved into his new job as Thurston County Commissioner in early January.

A 30-year-old alum, Marshburn returns to Evergreen after five years as a fiscal analyst for the House

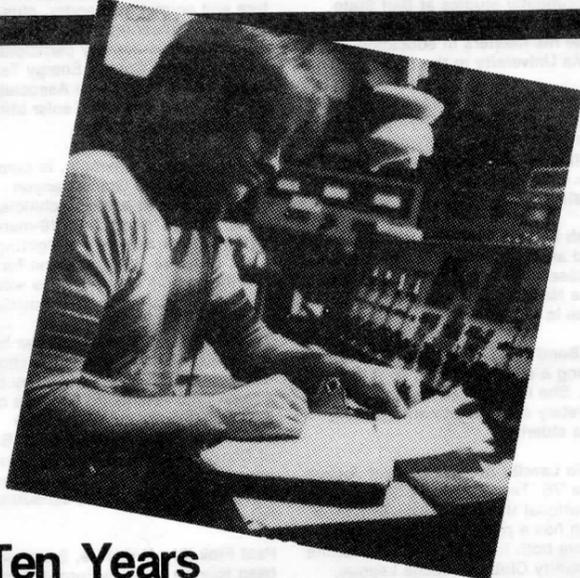

Ways and Means Committee of the Washington State Legislature, where his responsibilities included analysis of social service budget issues and agencies, and frequent oral and written presentations before the House. He also worked as a program analyst for the budget division of the Office of Financial Management after completing a degree in economics and political science at Evergreen in 1975.

Current student and programmer Tim Merk labors away in KAOS control booth.

KAOS Celebrates Ten Years of Community Broadcasting

by **Petrina L. Walker, '78**,
Alumni Board of Directors
and Wednesday a.m. Variety
programmer at KAOS.

Looking back fondly, I recall how adamant my darkroom buddies and I were when we wanted to listen to a commercial-free radio station and KAOS was the only signal that could make it into the cavernous concrete dark-rooms of the Photo Lab in the Library Building.

KAOS was it by default. Our main concern was never quite knowing what kind of music would be on the air at whatever point-in-time, it was an obvious hit-and-miss situation. But rather than darkroom-it in silence, we listened to KAOS-fm, and came to be pleasantly surprised at some of the programming.

KAOS (89.3 FM) began as a 10-watt, student-operated facility with a handful of dedicated people. Today, KAOS is a 1500-watt community radio station, and in the midst of celebrating ten years of operation.

The hard working staff is still quite small, with only four paid half time employees but there are over 150 volunteers. The programming format is more predictable now with variety and American traditional in the mornings, public affairs at noon, world folk and classical music in the afternoons, news from 6:30 to 7 p.m., jazz in the early evenings, rock n roll in the late evening, and variety music thereafter.

However, KAOS-fm continues to broadcast a variety of educational, informational, cultural, and entertaining forums not typically heard elsewhere. The station provides an alternative to its listeners and is dedicated to meeting the needs and interests of its listening community.

An exciting example of this is our "Alive in Olympia" series, running on Sunday nights at 7 p.m. through March 13. KAOS will be featuring the best of Olympia's musical talents, live from Evergreen's Communications building. Don't miss it!

Air play policy has remained steadfast: programmers are required to play at least 80 percent independent

recording artists (musicians who rarely get time on most stations). Preference is given to local live events, especially public affairs, spoken word, and educational programming.

Decision making at KAOS is still by consensus, and provides everyone with some control over the station's affairs. When consensus proves difficult, the decision is made by the Departmental Coordinator or General Manager, a recently created paid half-time staff position, is responsible for the day-to-day operation of KAOS-fm, and promoting the continuity so important for such a large volunteer organization. Michael Huntsberger is Mr. Continuity himself, a long-time supporter (TESC Alum, KAOS Engineer, volunteer, etc.) and all around good guy who helped keep KAOS going during some of the tougher times.

KAOS volunteers are trained formally and informally. People who want to get on the air quickly are trained individually with hands-on experience in the production studio, then the air studio. KAOS has recently developed a two-part leisure education workshop "Radio for Everyone." The beginning workshop permits people to become familiar with audio equipment, on-the-air programming, station policies and procedures, legal requirements, and the like. The advanced workshop permits people to learn the finer points of production, from voice and diction, interviewing and promotion, to radio theater, live broadcasting, and feature production.

Internships are encouraged! A student can learn the specifics of commercial-free public radio while working, and KAOS gets another interested, able-bodied person to teach, train, nurture, and appreciate.

The General Manager supervises all internships and conducts seminar discussions, training sessions, conferences, and other activities throughout the quarter. Most KAOS jobs are available for academic credit. One must be an Evergreen student and be committed for ten hours per week for the quarter for every four-

credit hours.

Fundraising is a quintessential feature of any commercial-free public radio station like KAOS-fm. Part of KAOS's funding comes from the Student and Activities Fee Review Board, but the rest of the monies must be raised through on-the-air marathons, auctions, rummage sales, letter-writing campaigns, movie/dance/concert benefits, and the monthly KAOS-89.3 FM "Program Guide" want ads.

KAOS has received a \$27,000 grant from the National Telecommunications and Information Administration to extend its signal into Grays Harbor County, west of Olympia—the first local public radio in that area. The potential for KAOS is tremendous. Its new listenership could swell by as much as 70,000, creating a broader base for fundraising efforts, as well as increasing community volunteer support. The educational, informational, cultural, and entertaining possibilities for regional service combine into an exciting outreach effort for both KAOS and The Evergreen State College.

The remodeling project is another long awaited change. The air studio is now a self-contained unit—no more interruptions from people walking through to get to the record library. The air studio, production, and multi-purpose studios are all centralized and electronically interconnected neighbors. Now the record library is just outside the air and production studios—convenience plus!

During the month of January, KAOS took the opportunity to say "Thank You" to the many thousands of listeners and subscribers who made it possible for commercial-free community radio to prosper and grow in the Olympia area during the past ten years.

I urge you to show your support for KAOS-89.3 by calling (206) 866-6000, ext. 5267 or drop KAOS a postcard of support at KAOS (89.3 FM), c/o The Evergreen State College, Olympia, Washington 98505.

Send us your rants, your raves, and above all, your support for public radio!

Alums Help Evergreen With Ready Answers and a Banjo

Evergreen alumni throughout the country are helping to recruit prospective students for their alma mater as part of the new Alumni Admissions Assistance Program.

The alumni volunteers came forth in response to an appeal published in last summer's **AlumNews**. In addition, alumni attending receptions in their honor (given in various cities by touring Evergreen staff members) said they'd like to help.

Doug Scrima, class of '78 and now Evergreen Admissions counselor, hosted a reception for alumni while visiting his family in Pasadena, California, this Christmas. Two Long Beach alums, **Mike Malloy, '78**, and **Cynthia Mazza, '77**, currently a graduate student at the USC School of Architecture, volunteered to help with admissions efforts in their community.

Walker Allen, TESC Registrar, hosted an alumni reception recently while on college business in San Francisco. Alumni caught up on the latest news from campus, and in turn briefed Allen about life after Evergreen in the Bay area. Following the get-together, the alumni attended a college information night and talked to Bay area high school students.

After the reception, five alums volunteered for future recruiting efforts: **Pam Johnston, '75**, and **Rick Speer, '76**, who have agreed to coordinate; and **Peter Pratt, '75**, **John Irwin, '82**, and **Geoff Rothwell, '81**, who are willing to help. The team will work on future college nights, and serve as local resource people for students with questions about Evergreen.

College fairs provided an opportunity for recruiting by alumni in several states last fall. **Diane Halpern, '81**, represented Evergreen in New Mexico at the Albuquerque College Fair in November.

Halpern reports she "really enjoyed the day, and felt positive about the response I received."

Despite meeting many students who "didn't know how to approach Evergreen's 'unique approach' to education," Halpern says, "there were quite a few people I talked to that I wouldn't be surprised to see in Olympia in a year or two."

Claudia Chotzen, '77, currently a practicing attorney in Honolulu, acted as spokesperson for Evergreen at the Hawaii College Fair on Oahu in late November. All public high school students on the island are bused to one location for the one-day Fair, where they can talk to college representatives from all over the country. Chotzen says most college-bound students from Hawaii choose a college on the west coast, and believes she interested several in Evergreen.

Evergreen made the television evening news in Anchorage, Alaska, when **Alan Levy, '81**, represented his alma mater during the Alaska Career and College Fair in October. Although other Washington colleges and universities were represented, Levy drew attention to Evergreen's booth by playing his banjo. An accomplished musician whom many alums will remember, Levy took two days vacation from his job to man the booth at the Anchorage Community College campus center. He was assisted by **Neil Bennet, '75**, who currently works as Vocational/Education Coordinator for the Salvation Army in Anchorage.

More alumni are welcome to assist in similar efforts in their home communities. If you'd like to join in, contact Ellie Dornan at the Alumni Office, Library 3103, The Evergreen State College, Olympia, WA 98505, or call her at (206) 866-6000, ext. 6569.

Mysterious relic, this snapshot shows the direction things were taking in 1974. A free tour of Michael Hunts-

berger's favorite stack o' wares to any alum who can provide the identity of these former programmers.

Alum Chickens Deposited at Food Bank

More than 300 pounds of chicken were donated to the Thurston County Food Bank over the holidays by the Alumni Association.

The Association's Board members, who have been serving their by-now-famous barbecued chicken at numerous fundraisers, decided by unanimous vote to donate the remainder of the fowls to the Food Bank because, as Alumni Coordinator Ellie Dornan explained, "We wanted to do something to help our neighbors and we thought all those chickens might be appropriate especially this Christmas when so many have been suffering from food shortages."

Due It in 1983!

Evergreen's Alumni Association was formed in the fall of 1977 when about 120 graduates and former students convened on campus to discuss the potentials and purposes of forming such an organization. It hardly seems possible, but we are well into our sixth year of operation.

For the first couple of years, the Association operated on a shoestring budget gleaned primarily from small fundraising activities. It soon became clear, though, that the Association needed a more stable source of funding to effectively develop and implement activities and services for the benefit of Evergreen and its alumni. Accordingly, alumni at the 1979 annual meeting approved a program and established \$7.50 as the annual membership payment.

In a few years, our membership has grown to nearly 300, and dues have helped significantly to provide a sound, growing financial base for the Association. Some of the activities and projects partially or totally supported by dues are book seminars, memorials, a winery tour, the prospective student lunch program, the annual Reunion and business meeting, the Alumni Directory, chicken barbecue equipment, legislative relations activities, receptions, graduation support, regional events, a member newsletter (the Geoduck Gazette), some general expenses such as postage and printing.

The membership year is January 1-December 31, so the time is now to send in your dues for 1983. Please help the Association in its efforts to serve you and your alma mater. Just complete the coupon below, clip and mail it along with your \$7.50 to:

AlumNotes

Jim Adams '78, Rapid River, MI, is currently teaching in an alternative high school in the Upper Peninsula of Michigan after serving an internship in curriculum development and teaching environmental studies at Ball State University in Indiana. Jim expects to receive his masters in education from Indiana University in the spring of '83.

Julia Baker '81, Olympia, is a play-school teacher for the Olympia Parks Department. She is applying to TESC to obtain her M.P.A. degree. Julie is a P.T.A. chairwoman, a facilitator for Educational Alternatives.

Joseph E. Blum '78, Seattle, has returned after having worked aboard Japanese and Russian fishing boats for the National Marine Fisheries Service in the Bering sea.

Mary Bond '82, Cambridge, MA, is enjoying a six-month visit to the east coast. She is happy to be employed as a secretary at an apartment building for the elderly.

Patricia Lavello Brecha '78, and **Joseph Brecha '76**, Tacoma. Patsy is a certified occupational therapist assistant while Joseph has a pottery business in Fife. They are both involved in the Sunshine Community Club, La Leche League, the Western Washington State Fair in Puyallup, and Joe is a member of the Advisory Board of the Pierce County Parks and Recreation-Sprinkler Recreation Center.

Fay C. Breed '81, Woodbridge, CT, is "learning the ropes" as an assistant photographer for Tom Hopkins, a commercial photographer beginning his own business.

Leonard Brennan '81, Arcata, CA, is a research assistant on a grant from the California Department of Forestry, researching habitat ecology of mountain quail. He is attending Humboldt State University, working toward his M.S. degree in Wildlife Management.

Jean Pierre Bressieux '79, Olympia, is self-employed as a designer/builder, designing and constructing solar greenhouses and consulting on space heating and organic gardening. He is applying to graduate school to obtain his masters degree in architecture.

Carol Camerer '80, Ukiah, CA, is a teacher/administrator teaching in a 2/3 classroom with a team teacher. This school is run by consensus with other staff members. Carol continues to be involved with Anti-Nuclear Affinity, Abalone Alliance and the Planetary Initiative for the World We Choose.

Homer L. Campbell '80, Lacey, WA, is a general partner with Alpine Insulation.

Ross G. Carey '75, Cleveland Heights, OH, reports his brother, **Drew Carey '76**, has just received his PhD in marine biology from St. Andrews University in Scotland. He is an assistant professor at Wesleyan University in Middletown, Connecticut.

Walter Carpenter '80, New London, NH, writes to tell us he has had two small articles published, has won two racquetball tournaments and has worked a team of jobs from ski lift attendant to parking valet and almost had an article published in New Hampshire Profiles Magazine.

Donald Case '76, Palo Alto, CA, has been studying at Stanford University for the past three years. He expects to receive his PhD in communication research in the fall of this year.

Bruce H. Clifton '80, Olympia, is the owner of a small retail/wholesale business.

Rick Cohen '76, Chicago, IL, graduated from medical school in Chicago and completed his internship in family practice at Cook County Hospital this past June. After marriage to Kim Wilson, they spent two months backpacking in the Canadian Rockies. They hope to relocate in a more rural area eventually.

Pat R. Cole '80, Olympia, is director of the Southern Puget Sound Solar Energy Association. Pat is in charge of financial management, fund raising, program coordination, and class instruction, and is also co-founder and past-president of this group. He is also on the Board of Directors for the Crisis Clinic.

Elizabeth Ann Colwill '80, Watertown, MA, is employed at Boston University as an administrative secretary to the assistant dean for student relations. She is also attending the University of New York at Binghamton, seeking a PhD. in history, and has attended a summer graduate program at Oxford, England.

Scott Englander '81, Pavilion, NY, is a carpenter/farmhand for Gratwick Farm and a designer/engineer for Martha Gates. In these half-time positions, he is involved with remodeling, horticulture and animal husbandry, plus solar design/engineering of residential projects. He is actively participating in the Livingston County Energy Task Force, the Solar Energy Association of Western New York, and solar utilization in northern New York.

Jon Epstein '81, Olympia, is currently employed by the Grand Canyon National Park as a park technician. He says, "I am a 'grunt' on a 19-man National Park Service fire fighting crew, based at Grand Canyon for 6 months." He is continuing to work on a career as a professional musician.

Marion Ericksen '81, makes her home in Arvada, CO, where she is exhibiting in a juried exhibit sponsored by the Arvada Fine Arts Guild and was one of 30 artists whose paintings were selected to be shown at United Bank of Denver. Marion is currently working toward a one-woman show, a cloud rock image series in oil, scheduled for fall of 1983.

Paul Fink '81, Ayreshire, Scotland, has been touring western Europe doing nuclear disarmament work. He has made extensive contacts with European peace organizations and has founded a new organization which helps people to deal with their feelings of despair, anger and numbness about the possibility of nuclear war.

Allyson E. Garland '77, Seattle, is currently a programmer trainee at Washington Mutual Savings Bank.

Joel Butchart Gilman '77, Seattle, received his Juris Doctor degree from the University of Puget Sound in December, 1982.

Cynthia C. Goodwin '80, Tempe, AZ, is employed as a youth care worker with juvenile delinquents. She plans to go to the School of Social Work at Arizona State University.

Dennis X. Goss '79, Renton, WA, is a June graduate of the University of Puget Sound School of Law in Tacoma where he was a member of Phi Delta Phi legal fraternity.

Jerry Luke Graser '81, Republic, WA, is employed by the Bonneville Power Administration as an energy auditor for the City of Cheney. He is an instructor for a solar water heater workshop, and has conducted workshops in Spokane, Ellensburg, Okanogan, and Cheney. He is an active member of the NEW ACT Energy Information Center in Republic. Jerry is also establishing a regionally self-sufficient homestead there.

Mark T. Handley, Ft. Wainwright, AK, has been employed by the U.S. Bureau of Land Management. He supervises eight firefighters on one of Alaska's two Hot Shot Wildland Fire Suppression crews. Mark is attending the University of Puget Sound School of Law this fall.

Vertice Leo Hankins, "Hank" '80, Yelm, WA, passed away. "Hank" was one of our oldest graduates. He died August 3, 1982, in Yelm.

Carmen Hanna '81, Olympia, has entered graduate school at Pacific Lutheran University for a masters degree in social science. Carmen is also involved in Mothers Against Drunk Driving (MADD), and is a volunteer tutor for a Cambodian girl at South Bay Elementary School.

Jon Henry Hansen '81, Olympia, is a drummer for the Jackson Prairie Band. He sings and plays drums in a five-piece country/rock band. Jon is active in the Musicians Local 124, Dixieland Band, and is a member of the Olympia Food Co-op. He plays the vibraphone and snare drum, studies with Don Adams, and has had a two-month tour of Northern British Columbia with the Jackson Prairie Band.

Michael C. Hansen '81, Clinton, WA, is manager of Warm Wind Books, where he supervises personnel, orders books, cards, crafts, and does the bookkeeping, etc. Mike is also a member of Clinton Learning Community and the Clinton Business Association.

Steve Harris '80, Okanogan, WA, is an orchard manager for Sunshine Orchard. He is an active participant in the New Zealand and Washington State Horticultural Association Orchard Exchange.

Dorothy M. Jackson '78, Olympia, is a health program specialist for the Department of Social and Health Services.

Brian Richard P. Johnson '81, Seattle, is a half-time reporter for the school newspaper at North Seattle Community College, and a half-time draftsman for Marcraft, where he prepares layout/floor plan drawings for commercial interior designers. Brian is taking computer courses at North Seattle Community College. He expects to go to graduate school specializing in architecture in the future.

Janet Johnson '80, Seattle, works for her sister doing yardwork, gardening, house cleaning, house painting and other odds and ends.

Pamela J. Johnston '75, San Carlos, CA, is employed as a coordinator of Special Education at the Jefferson High School District in Daly City, CA. She received her M.A. in clinical psychology from Antioch College in 1978 and is at present working toward a PhD. at the Palo Alto School of Psychology.

Crystal Jones '81, Tacoma, is a second and third grade teacher at the Montessori School for the Spring Valley School District. She is attending the University of Puget Sound for her fifth year certificate in education. She received her Montessori Elementary Certificate June, 1982. In her spare time, Crystal is renovating an old home in North Tacoma.

Preston Keogh '72, San Francisco, CA, is the first Evergreen Alumnus to graduate from Harvard Business School in June of 1982. He is now working for Pacific Telephone in San Francisco, responsible for developing pricing policy on \$2.5 billion of basic network services to 15 million customers in California and Nevada.

Marty Kinney '71, Bellevue, WA, is self-employed as a private piano/theory teacher. He hopes to return to school shortly at the University of Oregon for an M.A. in educational psychology. Leisure time activities include the Sierra Club and work toward completion of a book on teaching and learning strategies and attitudes.

Zachary T. Kittell '78, Olympia, writes to tell us that both he and **James Moore '77**, are training clerk and training coordinator respectively for Peter Kiewit Sons' contractor at Satsop. Both alums have recently completed a Safety Indoctrination Videotape for new hires. He reports the site has completed 5 million work hours without a disabling injury.

Jennifer E. Knauth '82, Marlboro, VT, is looking forward to going back to school for either a BFA or MFA in graphic design. She will be taking art history classes at Marlboro College this spring. So far, she's disappointed to report, she's been unable to find employment. Although she says she's happy the snow is finally falling.

Lori Koler '81, Lacey, WA, is employed part time as a real estate agent for Strout Realty.

Stephen M. Kopp '80, Seattle, is employed by the Puget Sound Blood Center as a pheresis technician, collecting and processing blood components from volunteer donors for use by bone marrow transplant patients.

lyda Kuth '80, Cambridge, MA, is a book production assistant for G.K. Hall & Co., where she proofreads, determines type specifications, and does paste-up. In addition, she is a freelance copy editor.

Paul Kenneth Lambert '81, Tumwater, WA, is a Book Binder III for the Washington State Department of Printing. Outside activities include being a board member of "The Artist Co-op Gallery" in downtown Olympia.

Wendy Lebow '80, Portland, OR, is an organizer for Oregon's National Abortion Rights League (NARAL), where she coordinates and speaks at house meetings and coordinates and/or participates in major fund raising.

Theresa (Ti) Locke '76, Seattle, has spent the past several years sailing in the tropics and elsewhere as a graphic artist. Ti now owns her own boat and is a free-lance graphic artist/photographer. She'd welcome hearing from any interested folk at (206) 328-1803.

Eric W. Longdon '81, Seattle, tutors junior and senior high school students in mathematics and physical science. He is also attending technical school, studying electronics for an A.S.

Christopher Martin '80, Vancouver, WA, is employed by Clark County Public Utility District as an insulation installer with the B.P.A. weatherization program.

Board Meeting

The Alumni Association Board of Directors will meet next on Saturday, April 16, at time and location to be determined. The meeting will probably be outside of Olympia, and all alumni or former students are welcome to attend. For more information, call Ellie, Alumni Coordinator, 866-6000, ext. 6569.

Get Yours

All 1983 members who have paid their dues should have received their Alumni Directories. If you have not, please contact Ellie in the Alumni office.

Balsley Aboard

After ten years out in the "real world," Kenneth D. Balsley, '73, is coming back to Evergreen. Since working on the original Cooper Point Journal, then known as The Paper, Balsley has served as counselor for delinquent youngsters, editor of the Lacey Leader, news director of KITN Radio in Lacey, and, most recently, media relations specialist for the Public Affairs Office of the Washington State Department of Transportation, as well as teaching journalism courses at Olympia Technical Community College and Evergreen. Also active in a number of community organizations, Balsley joins the Office of College Relations to work the news bureau while Director of Information Services Judy McNickle takes a temporary leave to report on the 1983 Legislature for the Washington State Democratic Caucus.

Alumni Art Exhibit

Attention all you fine artist alums, there is going to be an exhibition of visual art by Evergreen grads at your alma mater during Fall 1983 in Gallery Four of the Evans Library. However, to participate you must be a current, paid-in-full member of the Alumni Association.

Look for more details in the spring **Review/Alum News**, or get your name, address, telephone number, and art medium on a mailing list to be certain you'll receive the latest updates about this exhibit. Send to:

AlumNotes

Doyle Ann Hall Marvin '80, Portland, OR, is a homemaker/gardener. She is applying to graduate school to obtain her teaching certificate. This fall, she is employed by The Delphian Foundation, teaching at a private high school in Sheridan, OR.

Edward F. McQuarrie '76, Cincinnati, OH, is an assistant professor of marketing at Northern Kentucky University and ABD (all but dissertation) in a PhD program in social psychology at the University of Cincinnati.

Rennie K. Mead '76, Olympia, is working for Ft. Steilacoom Community College in the Displaced Homemaker Program. She is an instructor/counselor for Career Planning and Placement. Rennie also teaches Coping with Divorce, a Community Service class.

Hadrian Micciche '80, Seattle, works for Highline West Seattle Mental Health as a mental health therapist. The center provides individual and group therapy to severely psychiatrically disabled adults. Hadrian is attending Whitworth College for a Masters degree in behavioral science. Hadrian should be a proud new parent by now.

Timothy Nogler '81, Seattle, is self-employed as a carpenter/painter, doing interior and exterior remodeling and painting. Tim is currently seeking employment in the field of energy conservation and continues his interest in Democratic Socialists of America and is a member of the Puget Consumer's Co-op.

Michael F. Nolan '81, Huntington Beach, CA, is a teacher aide for the YWCA. He is the recreational coordinator, supervising elementary school children in sports activities at after-school, day care programs. He is applying to the University of California at Irvine for his teaching credentials in education (English). Through the '81-'82 academic year, he took Russian and Spanish at U.C.C. while working part-time. During this summer and for the next five academic quarters, he will be taking undergraduate English and American literature courses in addition to continuing with Russian and Spanish to meet the California State teaching requirements for prospective high school English instructors. These courses will be taken as a "limited status" graduate student in the Department of Teacher Education.

A. Clifford Olin '81, Olympia, is employed by the Timberland Regional Library. He is a weekly worker at the Olympia Food Co-op and is a member of Amnesty International's Urgent Action Network.

David A. Olson '81, Salina, KS, is a gift store manager for his parents business.

Christine S. Ottman '81, Shelton, WA, works at Shelton Veterinary Hospital as a Kennelman Veterinary Assistant where she helps care for the animals, acts as hospital orderly, and assists the veterinarian. She is applying to graduate school for a D.V.M. Christine also finds time to do volunteer work at Centralia Public Library.

Richard J. Ordos '81, Olympia, is a client services representative for Allied Data.

Mary Ossinger '80, Port Angeles, WA, is employed by Western Washington University as a graduate teaching assistant in biology. She is studying for her masters degree in plant ecology at the university.

W.J. "Jake" Otten '81, Vancouver, WA, is employed by the Vancouver Medical Center as a lead communications specialist. He is responsible for teletype and keypunch communications and providing rapid, reliable and efficient communications service for the consolidated Portland/Vancouver area. "Jake" is involved in the area YMCA and is an eagle scout counselor.

Nani M. Paape '76, Wallingford, PA, is attending Pendle Hill, a Quaker school/retreat/study center. She will maintain her interest in biking, quilting and sewing.

Margo L. Otto '80, Shelton, WA, is a fourth grade teacher for the Shelton School District. She is active in the Orthopedic Guild, Women's Service and Social Club, youth sports, and softball.

Dorothy Mae Palmer '81, Tenino, WA, is a phototypesetter for Lafromboise Newspaper where she operates numerous computerized typesetters and photo equipment. Dorothy is applying to the University of Puget Sound to pursue her J.D. degree. She is the captain of the Volunteer Fire Department and a member of the International Arabian Horse Association.

Melissa B. Parker '81, Seattle, is a graphic production artist for Peanut Butter Publishing, where she is doing design and paste up of a national cookbook and menu guide series. Melissa is an active member of the National Organization for Women and owns her own Amway business.

Greg Parkinson '74, is now owner/operator of Oregon Audio News in Salem, OR. "It's sort of a logical step for me," said Greg. "After five years of news broadcasting in Oregon and three years at the state legislature in Olympia, this job is a marriage of my two main interests—politics and media." The network involves eight radio stations and two television stations, from Portland to Medford.

Scott Parris '77, is now general manager of Continental Tropicals, Inc. and is entering the UCLA Graduate School of Management this fall. He is planning to graduate in spring of 1984.

Randy Phillip Partridge '78, Evanston, IL, is attending Northwestern University where he is seeking a PhD degree in the area of learning disabilities—neuropsychology and psycholinguistics. Randy obtained an M.A. degree in August, 1982.

Bonita A. Pattison '79, Lacey, WA, is employed by Morningside Inc. in the Quality Control Department.

Patrick Paul '80, Seattle, is a private consultant on alcohol and drugs. He trains Indian alcohol/drug counselors and consults/evaluates Indian alcohol/drug programs. Patrick is applying to graduate school, working toward his Ph.D. in philosophy. He serves on the Northwest Indian Alcohol/Drug Specialist Certification Board and on the Seattle Central Community College Advisory Board.

Nam Chu Pearl '79, Olympia, is a fiscal management analyst for Washington State Employment Security.

Sandra J. Peichocki '79, Belfast, ME, presently employed as a librarian, has been traveling to France and Ireland this summer. This September, her marriage to Francis Lehman probably overshadowed other activities, which include a Nuclear Issues Study Group and a twice-a-week children's story hour, as well as other library duties.

Heather McRae Perkins '79, Eugene, OR, is a restaurant worker at the Homefried Truckstop where she cooks, waits table, washes dishes and helps run the business collectively. In her spare time, Heather is a member of the Oregon Falconers Association.

John Petrich '79, La Conner, WA, is employed by the Swinomish Indian Housing Authority and is executive director in charge of overall management of federally assisted housing for the Swinomish Tribe. John is also vice chairman of the Association of Western Washington Indian Housing Authorities.

Nancy Truitt Pierce '79, Seattle, is director of Women's Programs for South Seattle Community College. Duties include program planning and management, counseling of women students and some teaching. She is fixing up an older home she and her husband recently bought. She is raising her three-month-old daughter Teresa. Nancy is active on her church's Christian education committee, a member of NARAL and W.W.U. (lobby group), member of Displaced Homemakers National Network, and treasurer of Washington Association of Community College Women's programs.

Bill Pilling '81, Lafayette, CA, has been a ranch hand during 1981 and '82. He is applying to graduate school to obtain his Ph.D. in social theory.

Lee Piper '79, Edmonds, WA, is the director of the Multicultural Student Service at Highline Community College. Lee received her Ph.D. in 1982 from Union Graduate School, San Francisco, CA. Her varied community activities and organizations keep her very busy. Included are United Indians of All Tribes, Indian Health Board, Indian Vocational Education Task Force, Indian Education National Consultant, Indian Education Program Evaluator, Indian Religious Ceremonies, Ohoyo Indian Women's Organization, Washington Vocational Education, National Indian Education Association, Tacoma Indian Center, and Adult Education Programs.

Nancy L. Pollard '80, Port Angeles, WA, has been accepted to graduate school at Southern Methodist University, Dallas, Texas, where she will obtain her masters degree in music, vocal performance. She made her operatic debut in the Seattle Opera Association in January, 1980, performing in Verdi's Rigoletto.

Laura Linda Negri Pool '79, Portland, OR, is a headstart teacher for the Mt. Hood Community College Headstart program.

Victoria H. Poyser '81, Flushing, NY, is self-employed as an illustrator. She is illustrating covers and interiors for paperbacks and hardcover books for Pocketbooks, Doubleday, Tor, etc. She won her second Hugo Award for science fiction illustration this fall.

Daniel Preston '79, Mt. Rainier, MD, is employed as a research assistant to research and prepare a documentary publication from the papers of William Thornton. Daniel is presently attending the University of Maryland seeking a Ph.D. degree. He obtained a Masters degree in 1981. Daniel is also employed as a teaching assistant at the University of Maryland.

Veil A. Pritz '78, Chicago, IL, is assistant director of the Annual Fund at the University of Chicago, and is in the Business School there.

Madeleine Pullman '80, Salt Lake City, UT, is attending the University of Utah or her Masters degree in mechanical engineering. Madeleine is a member of the Utah Solar Advisory Committee and the League of Women Voters.

Jean Putnam '81, Olympia, is a homemaker. In her spare time, she teaches English to refugees, teaches a Chinese friend to read and write English, volunteers in church and cub scouts and is actively raising two children while studying a real estate course.

Geff Ratcheson '79, Bellevue, WA, is a record store manager. He is currently playing guitar with the Roosevelt House Band and with "Willy."

David J. Rauh '79, Olympia, is employed by the Lost Music Network. He is the national sales director for OP magazine and president of Three Cities FM Inc., and applicant for a commercial FM radio license. Outside activities include the Crisis Clinic Board of Directors and the The Evergreen State College Alumni Association Board of Directors.

Deanna Ray '80, Concrete, WA, is a park aide for the Washington State Parks Department. She is a volunteer at Concrete Elementary School, working on a committee for community celebrations. She has had a child since graduation.

Larry T. Russell '73, Dhahran, Saudi Arabia, is presently employed by C.F. Braun Division of Santa Fe International Corporation—Construction Division as a construction engineer.

Wendy A. Sayan '81, Seattle, is a vocational counselor for the Seattle Hearing and Speech Center, where she assists the disabled in finding employment. She is a member of the Southwest Seattle Christian Center.

Charles T. Schick '81, Olympia, is applying to graduate school to obtain his M.S. degree in zoology. Outside activities involve regular classes at Johansen School of Ballet. Charles is finishing up laboratory work as an extension of his National Service Foundation Student Originated Studies grant on shorebirds and falcons. He has several papers he will try to have published.

Gayle I. Seat-Locke '79, Lacey, WA, is office and business manager for G & G Production. This is a self-employed business and her husband is the salesman.

Neil A. Shamberg '80, Olympia, is co-owner of the Western Washington Alcohol Information Center, an organization that provides diagnostic evaluation, counseling and treatment of alcoholism.

John Louis Umlauf, Jr. '74 Barrytown, NY, was recently married to Melinda James of Buffalo, NY, in the 2,075 couple wedding in New York City. John is finishing his Master of Divinity studies at Unification Theological Seminary this coming June. Both John and Melinda hope to settle in Boston. Currently Melinda is director of a neighborhood ministry program there and John hopes to specialize in campus ministry.

Willene Williams '81, Rochester, WA, has remarried since graduation to Jim Smith. She is teaching pre-school three mornings a week and is substitute teaching on Tuesdays and Thursdays.

Elizabeth Winter '82, New York, NY, works for a think tank of bankers near the top of the World Trade Center. She also attends NYU in a new masters program in photography.

June
4

SUPER SATURDAY celebration, 11 a.m.-7 p.m., central campus plaza... Entertainment, arts and crafts, children's events, recreational competition, and more... Free...

Phone-A-Thon '83

Right now all systems are revved up and ready to go for the seventh annual Phone-A-Thon. Our goal this year is to raise \$25,000 for Evergreen scholarships, student and faculty research, and educational programs and special projects.

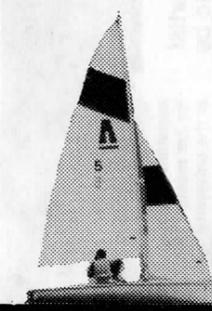

Beginning February 14, over 100 students, faculty, staff, alumni, Trustees, Foundation Board Members and other friends of the college will descend on the Board Room to take over the phones for three weeks of calling alumni and parents all over the country.

So this year when your alma mater calls, please consider saying "Yes!" and make a pledge to Evergreen. Thank you!

M Masters in **P** Public Administration **A**

**Economic Development Conference:
Evergreen's Link to Leadership**

Dr. Russell Lidman,
Director, Graduate Program
in Public Administration

The forty-eighth session of the Washington State Legislature had barely convened before students and faculty from Evergreen's masters of public administration began to seek solutions to what Speaker of the House Wayne Ehlers calls "one of the toughest periods in the history of the state."

With unemployment at the highest level since the Great Depression and state revenues falling millions of dollars below projections, legislators and citizens convened on campus to confer with economists, historians and business leaders from throughout the Western states to "ask hard questions about economic development and jobs."
