

2. The IAVMP must be developed and approved/adopted by the sponsoring local lake group or homeowner's association according to the guidance in "Department of Ecology Vegetation Management Plan Guidance" (enclosed). The "A Citizens Manual (Guide) for Developing Integrated Aquatic Vegetation Management Plans" may also be helpful and can be obtained from Ecology (360 407-7472) or the Internet at <http://www.wa.gov/ecology/wq/links/plants.html>.

S7. Other Requirements:

1. An Ecology employee or his or her designee shall be present during the initial treatment unless he or she determines otherwise, whereupon the applicator shall be made aware of relief from this condition prior to the scheduled treatment. If, at such time, Ecology has not arrived at the designated meeting site within thirty (30) minutes of scheduled time, the applicator may proceed with the treatment.
2. When an EPA label and/or Ecology Order has restrictions for domestic use or for treatment near potable water intakes, the applicator, before any treatment, shall confirm no surface water diversion exists within the distance specified on the label. The applicator must confirm that diversions are not for domestic use. If any diversions are for domestic use within this distance, no treatment is permitted. Permission for treatment from a legal water user does not remove this restriction. If no withdrawal pipe exists or the existing pipe is permanently capped, this condition does not apply.

GENERAL CONDITIONS

- G-1 The applicator shall comply with all pesticide (including herbicide and adjuvants) label instructions. When application conditions in this Order issued by Ecology differ from those on pesticide labels, the more stringent of the two requirements must be complied with. However, no condition in this Order shall reduce the requirements on the pesticide label.
- G-2 All persons applying pesticides under this Order should be aware of the following regulations:
- A. The pesticide applicator regulations as required by the Washington Department of Agriculture (RCW 17.21, RCW 15.58, and WAC 16-228).
 - B. Public access policy and Hydraulics Code regulations as required by the Washington Department of Fish & Wildlife (RCW 77.55.100, WAC 220-110).
 - C. Shorelines regulations as required by the local city or county (RCW 90.58).
 - D. All applicable regulations of other agencies. Check local ordinances for compliance.
- G-3 A. The applicator shall FAX a list of planned treatments to Ecology's appropriate regional office by the close of Ecology's business day (5:00 p.m.) prior to the day of treatment. This list shall contain the following information on the FAX form provided by Ecology:
1. The names of the waterbodies (as written in Specific Conditions: S1 of this Order) that are planned for treatment, in the order that they are planned for treatment;
