Editor's Note

Craig McLaughlin

Back in November 1994, Kurt Dahl, "2020world" columnist for the Seattle Times, asked Lewis J. Perelman whether education would be "as extinct as the horse and buggy" by the year 2020. Perelman, who had just published *School's Out: Hyperlearning, the New Economy, and the End of Education*, answered, "Yes, I'd expect that academia will be mostly in the dustbin of history by then."

When anyone talks about something going the way of the horse and buggy, I try to pay attention. Several generations back, my paternal grandmother's family was in the horse-and-buggy business — the brothers of that generation were carriage-builders in New York City. When the horseless carriage came along, the brothers chose to ignore it.

Their major competitor, also run by brothers, decided to make the transition to motorized transportation. The other company was called the Mack Brothers. Mack is a household name now and the Mack brothers' descendants are wealthy. The name of my grandmother's family, however, is now forgotten even by me, and many of their descendants — myself and most of my immediate family included — toil in the fields of academia.

So now it looks like my family's livelihood could be threatened once again.

Perhaps it's a genetic flaw, but I don't accept Perelman's prediction. There will certainly be huge upheavals in education, and computer-assisted learning, often conducted across great distances, will become more common. But virtual classrooms don't preclude actual classrooms.

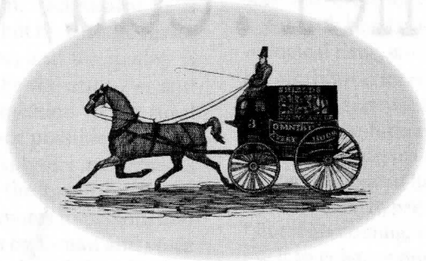
I confess that I'm excited to see the range of educational opportunities expand as our technological capabilities expand. As the people seeking an education in this country become increasingly diverse, so should their options. But I expect there will still be a place for academic communities that rely on face-to-face interactions.

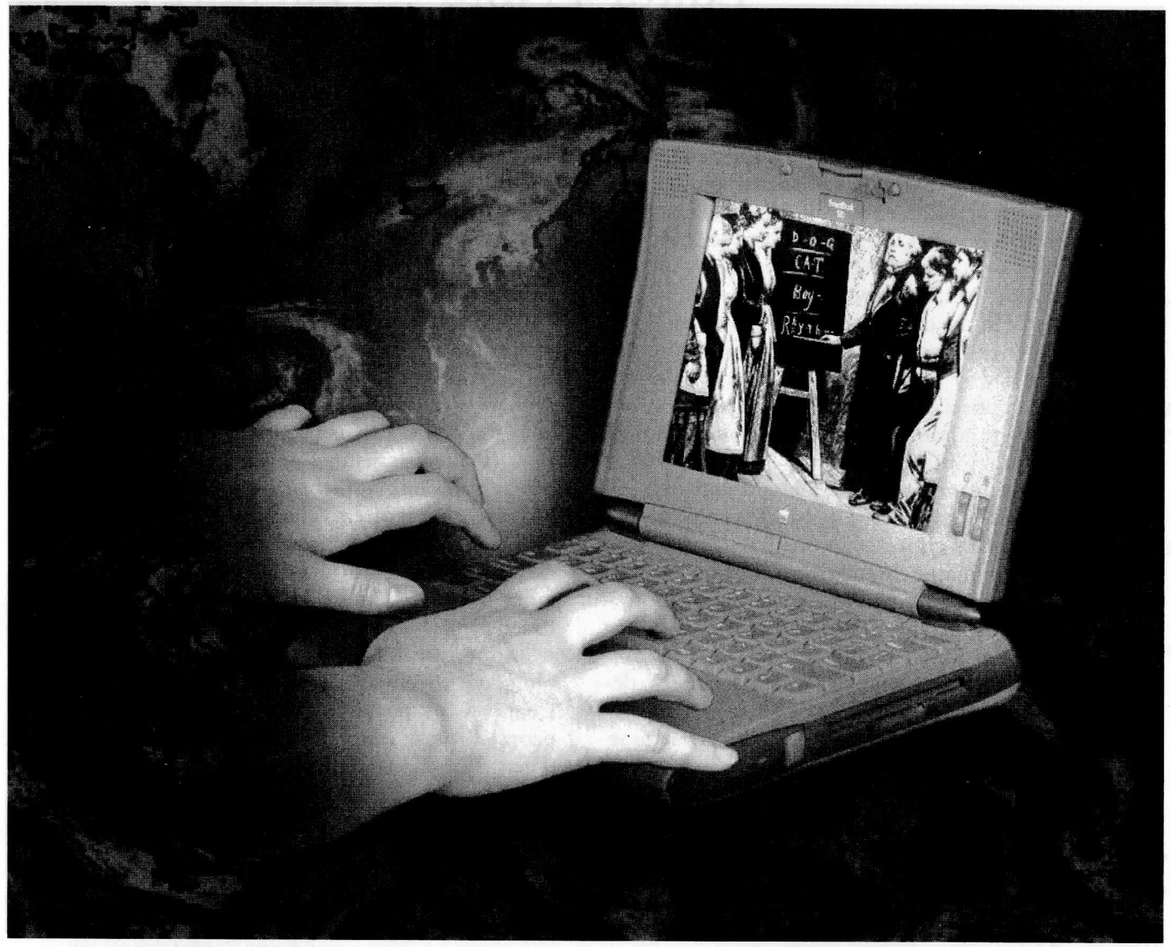
What will happen, I believe, is that individual schools will be forced to identify and concentrate on what they do best. Evergreen is in an advantageous position as it enters this new era. It already has a clearly defined mission. It offers a distinctive curriculum and it serves a specialized niche of students who appreciate what it offers. The skills it emphasizes — independent thinking, creative problem-solving, collaboration — will only become more important in a high-tech, information-based economy.

So maybe it's too soon to flee the crumbling, ivy-covered walls of academia. You see, I enjoy working in close proximity to other people. I enjoy watching their eyes and hands when we talk. I enjoy fast and furious intellectual discussions unconstrained by time delays and bandwidth limitations. I enjoy a handshake or a hug now and then.

Sometimes I wonder whether my distant uncles really made a stupid mistake or just an unprofitable choice. Maybe they didn't like the noise those newfangled engines made. Maybe they didn't like the stench.

Maybe they just liked horses.





Technology is Changing What We Teach – and How We Teach It

By Craig McLaughlin

THE GREAT THING about the future is its malleability. If you believe hard enough and click your heels together three times, any plausible scenario can seem real. But as the gap between the here and now and the there and then narrows, a lot of scenarios get blown away like so much chaff before a Kansas tornado.

Higher education is a case in point. People have been predicting for years that new technologies — computer networks, high-bandwidth telecommunications, the Internet, multimedia and the World Wide Web — will reshape the educational landscape.

Some educators argue that these technologies — and the new teaching techniques they are engendering — will make education more accessible, more inclusive and less expensive. Others say they will encourage factory schools where a distant faculty member, or a distant piece of software, dispenses facts to thousands of passive students.

To understand what could be at stake, consider the following scenarios:

One involves a mythical student a hundred miles from any state university. She is a single mother and doesn't want to quit a good part-time job and move her family far from supportive friends and family. For a few hours a day, she participates in live, interactive lectures. She has found the perfect class, one team-taught by two faculty members and an internationally renowned expert who participates from Bangkok. When she has a chance she gets on her computer, purchased with financial aid, to do research on the Internet, request books from university libraries across the state or participate in an on-line discussion. She submits assignments by E-mail and receives detailed comments back. Twice a quarter she travels to campus for intensive sessions with her faculty members and other students.

Another scenario involves a student who wants to concentrate on his studies in a community dedicated to learning. Only the state has stopped building campuses and there just isn't room. Technically, he is enrolled at the nearest state university, but he selects courses from all over the western United States and the quality is spotty. He has an old computer — all he can afford — and no way to get a high-bandwidth connection to his rural home, so interactive discussions are not possible. Instead, he watches lectures on television and submits assignments over the Internet. He has never met the faculty member teaching the course or any of his classmates in person, and probably never will. He communicates by E-mail and voice mail and rarely gets a response. He has heard that the faculty member gets hundreds of messages a day.

Both scenarios are plausible. From New York to London, Catalonia to Olympia, students are receiving their syllabi, their reading materials, their assignments and, in many cases, their instruction electronically. Already, Evergreen programs like the Virtual College and Student Originated Software use the campus Web site to exchange materials. At some colleges it is possible to get a degree without ever setting foot on campus.

We have the technology — with more on the way — and economic and demographic pressures are pushing states to deploy that technology quickly. "There are three main problems facing state higher education in the '90s," says Carol Twigg, vice president of Educom, an organization promoting technology in education. The first, she says, is the need to increase access, the second is the need to improve the quality of education and the third is the need for colleges and universities to control rising costs.

In the search for ways to serve more students with less money and not sacrifice quality, politicians and educators are looking to technology to provide solutions. Higher education is being swept up in the vortex of the future.

So which scenario are we likely to find when we pull back the curtain on the future? Pundits are still debating that question, but the best answer may be: both. It isn't so much a matter of whether colleges and universities will use new technologies, but whether they will use them well.

Until recently, the eye of this debate has largely bypassed Evergreen. Evergreen prides itself on small classes, seminars that promote student participation, narrative evaluations, collaborative learning, team-teaching and lots of interaction between students and faculty members. The college's emphasis on direct, personal contact does not encourage extensive use of computers and television monitors as intermediaries.

"The important question," says faculty member Thad Curtz, "is whether there is any way to use this new stuff so that teaching and learning happen better than when you have a set of people in a room talking face-to-face. I haven't seen any evidence that that's true so far."

But with legislative funding for education going into technological fixes, with population pressures growing and with the likelihood increasing that Evergreen will soon become a node on a statewide electronic educational network, the debate over the future role terms like *computer-assisted education, virtual classrooms* and *distance learning* will have in the Evergreen lexicon has taken on a greater sense of immediacy.

"It has been hyped up," says faculty member Sarah Williams. "But if it's coming, we should be figuring out creative ways to use it to enhance our interdisciplinary, experimental teaching and learning."

"If you have an institution that values collaborative learning, can technology play a role? Yes it can."

–Carol Twigg

DISTANCE LEARNING is not new. Correspondence courses have been around for decades, as have televised for-credit classes. But new telecommunications technologies have put a new spin on distance learning:

- At the Open University of Catalonia, 200 students across northern Spain are participating in a pilot program that connects them electronically to lecturers, tutors and learning materials. The school hopes enrollment will soon reach 11,000 students.

- In the United Kingdom, 25 percent of all new MBAs receive their degrees through the distance education program at that country's highly regarded Open University.

- In March, Washington State University adopted a strategic plan for creating a "Virtual WSU." Under the plan, the number of faculty members using new technologies in their teaching will increase from 50 in 1996 to 1,000 in 1999.

- The Western Governors' Association has approved a vision statement for creating a "Western Virtual University" that will provide a technology-delivered regional curriculum.

Virtual learning programs offer some advantages over campus-based programs, one of which is greater access — for people with disabilities, for example, or for people who live in the middle of nowhere. "Not everybody can get to campus," says Elissa Tenny, associate dean for administration at The New School for Social Research in New York City, which offers 160 on-line classes.

Ease of access is becoming increasingly important as the profile of the typical student changes. Of the 14 million people attending U.S. higher education schools, only 3 million are full-time residential students under 22 years of age, according to the National Center for Educational Statistics. The Annenberg/CPB Projects predicts that more than half of all college students in the year 2000 will be older than 25.

Older and returning students often have a different set of needs and expectations than traditional students. Tenny says that when New School studied returning adult students, "we found that they were demanding very vigorous coursework, but they were juggling a lot of things in their lives, so the access issue was very important."

But there is more behind the new push for distance learning than whether future students can get to, or want to get to, a traditional campus; there is also the matter of whether there will be a campus for them to go to. Because children of baby boomers are becoming young adults, the nation is on the cusp of an explosion in the population of college-age people. By 2008, the number of high school graduates will increase by more than 34 percent. More people will want to go to college than there will be seats waiting for them. This "baby boom echo" is arriving during a time when financial resources are tight and fiscal conservatism is the political norm.

This situation is particularly acute in Washington because of rapid population growth and limits on state spending. The Higher Education Coordinating Board has warned of an impending "crisis" and predicts that 84,000 additional students will want to attend college in the state by 2010. There is currently room at state colleges for 50 percent of today's high school seniors, but when today's kindergartners graduate from high school, there will be room for only 38 percent of them. Meanwhile, the proportion of state funds going to post-secondary education has dropped from almost 17 percent to 11 percent. One of the HEC Board's proposed solutions to this conundrum is to leverage new technologies.

During the 1996 legislative session, the state's six four-year colleges and universities asked for $36 million to build interactive electronic classrooms and a statewide telecommunications network—a backbone of "big pipes"—that would connect the six institutions. The system would have dissolved traditional geographic turfs. University of Washington could have offered its science curriculum in Spokane and WSU could have offered hotel management in Tacoma. For Evergreen, the Washington Higher Education Network, or WHEN, would have provided low-cost access to the Internet and an interactive link to the Tacoma Campus.

What the Legislature approved was $54.3 million to plan and begin building a network that would connect all the state's schools, including elementary, junior and senior high schools and community colleges. It also gave oversight over the project to the state Department of Information Services. Governor Mike Lowry vetoed $12 million of the appropriation because part of it was to have come from a fund dedicated to other purposes.

"Higher education institutions are grappling with how to provide quality education opportunities for so many new students — and the legislators are grappling with how to fund those opportunities," says Kim Merriman, special assistant to the president for governmental relations. "The technology backbone is looked at as a way to provide more access to students."

"The important question is whether there is any way to use this new stuff so that teaching and learning happen better than when you have a set of people in a room talking face-to-face."

–Thad Curtz

Providing access to education, however, isn't necessarily the same as providing education. Advocates for computer-assisted learning say it can actually provide a better education for some students. The New School has talked to students and faculty to assess its programs, and Tenny says, "We've been very happy with what we've found out. The quality is as high as our classroom courses or higher."

She adds, "There are a number of students who are the quiet type and sit in the back of the classroom. Those students have to speak on line, and they tend to flourish in this environment."

Many of those same advocates say they understand Evergreen's distinctive philosophy — "we consider you kin," says Tenny — and believe some of these techniques could be put to use at Evergreen.

"If you have an institution that values collaborative learning, can technology play a role? Yes it can," says Educom's Twigg, who was once associate vice president for academic affairs at Empire State College, an experimental state school in New York. "I worked at Empire State College for 16 years prior to coming to Educom. We emphasized similar things and used all kinds of distance learning techniques quite successfully."

Some advocates also say they would like to see Evergreen play a national role in determining what works in high-tech education. "Places like Evergreen already know far more about pedagogy than most large universities," says Twigg.

But many at Evergreen are wary of distance learning techniques. "I've got some real concerns about the difference between a machine-mediated interaction and a face-to-face interaction," says Peter Randlette, a staff member and adjunct faculty member. He points out that people learn using visual, aural, kinesthetic and other means. "The whole idea of an Evergreen learning experience is that there are many modes of learning."

Another part of the Evergreen experience, he says, is taking theoretical knowledge and learning how to apply it, something that's hard to do across a computer interface. "Knowledge has to be applied outside of a text-based format," he says.

Curtz says some aspects of computer-assisted education appeal to him — like being able to carry out contracts with students traveling abroad, bring people from different walks of life into a program discussion and enable students to contribute to a discussion while an idea is still fresh in their heads — but he says some supporters of technology in the classroom are short-sighted.

In an Evergreen seminar, he says, "people can learn how to articulate their views and present them persuasively, and that's extremely important for their future success in the world. I think an enormous piece of what matters about seminars has to do with us coming together. Education isn't just about ideas, it's about passion and the complicated interactions between people and the different views that they hold."

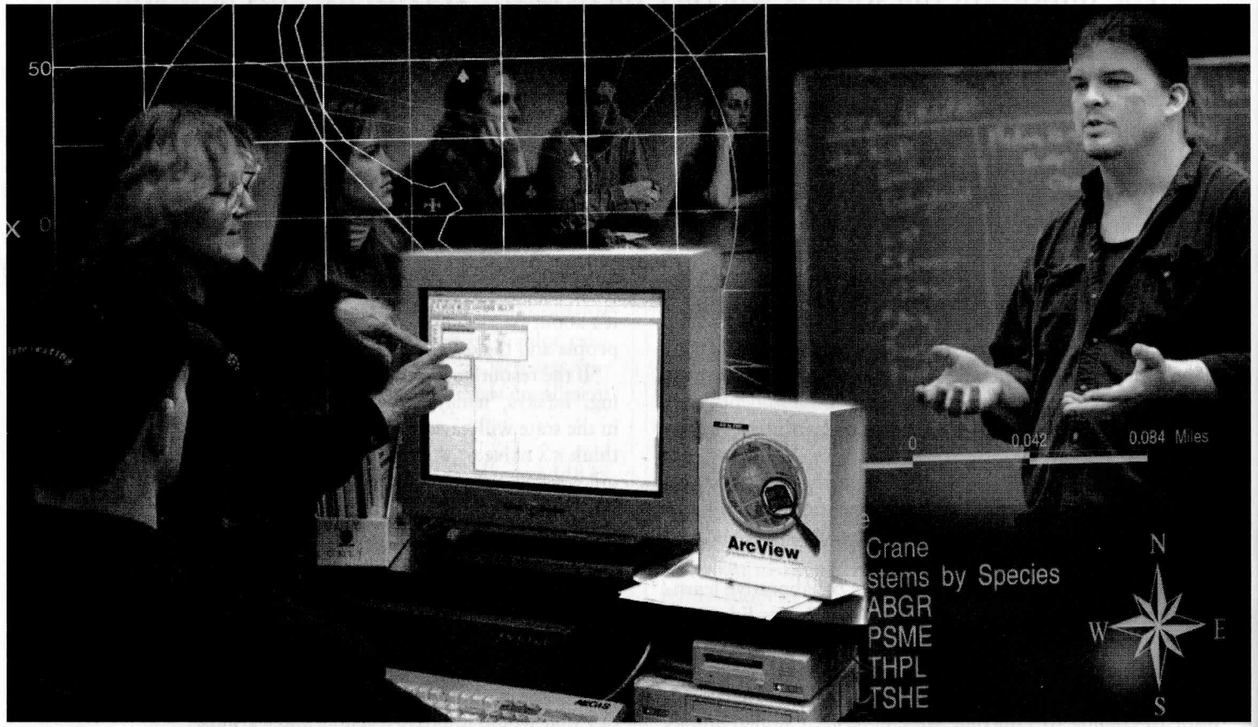
"If the resources allocated to higher education keep shrinking," he says, "it may be that Evergreen and every other college in the state will have to find new ways to serve students. But I think it's naive to think that most current uses of new technologies will allow us to serve students without impoverishing a liberal arts education."

The question under discussion at Evergreen — a faculty and staff discussion group has been meeting monthly to discuss these issues and held a campuswide forum in April — is how Evergreen should explore which new technologies it might want to employ. "The good way in which the college might do this," says Curtz, "is to support people on the faculty who have a vision about things they might do using this technology that would improve teaching and learning."

But others argue for a more proactive approach. "There is no reason for us to be isolated," says Randlette. "We should look at it as a way to complement what we do and make the excellence we support available over a different medium. This is a great opportunity to figure out how it works well."

Academic Dean John Cushing cautions against rushing to formulate an official response to technological trends. "In the short run, we tend to overestimate the transformations these new technologies will bring," he says. "In the long run, we tend to underestimate them. These technologies will transform higher education far more than we realize, but I don't think Evergreen ought to try to be the leader in this transformation until we have some idea about where we want to go with it."

Cushing collects antique radios and can point to many articles from the '20s and '30s that predicted radio would radically reform the classroom. "It didn't happen, and it didn't happen with television," he says. "Not that that means it won't happen with computers, but it's a good tonic against overenthusiasm."



Programming With a Purpose

In the Student Originated Software Program, Student Teams Design Real Projects for Real Clients

By Brian Rainville '90

When Nate Waddoups '94 scanned the want ads just before graduating from Evergreen, all the programming jobs required previous experience. But even without professional seasoning, it took the Evergreen graduate only two or three weeks of "pushing a skimpy resume around" to land a job with ConnectSoft in Bellevue.

Waddoups' success doesn't necessarily disprove the running joke among programmers that all of the entry-level jobs available require journeyman-level experience. Rather, it proves the value of a distinctive Evergreen program that teaches software development while approximating real-world conditions.

"It's hard for an employer, especially in computer programming, to put a value on a degree," Waddoups says. "But I was able to say I had spent the last year working on a software development project, and I did this nifty thing and the response was, 'Wow you've already seen the product development cycle. Do you want a job?' Now I'm writing Windows software and getting paid for it."

The nifty thing Waddoups did was to help create Glide — a software tool that teaches programming through a visual interface similar to the type used for computer solitaire games. Waddoups and a team of fellow students spent an academic year creating Glide as part of Evergreen's Student Originated Software (SOS) program. Students form teams and spend a year developing, designing and creating a software program for a "client." Each project must have real-world, social value and fill a need for an actual user. The program models the programming process that happens at software companies.

"When I first got [to ConnectSoft], we'd have these management meetings and it just reminded me so much of the meetings we'd have in class," Waddoups says.

This focus on teamwork and real-world applications has caught the attention of the National Collegiate Inventors and Innovators Alliance, a nationwide resource for universities and colleges trying to create innovative curricula around technology and invention. Last year, NCIIA published the SOS syllabus and other course materials in a handbook for the kinds of programs it wanted to promote. This year, it gave the program a $13,500 grant that will enable SOS to bring in two speakers, provide direct support for team projects and purchase a Sun Microsystems computer.

NCIIA is affiliated with the Lemelson National Program in Invention, Innovation and Creativity. Both are at Hampshire College in Amherst, Massachusetts and both are funded, along with related initiatives across the country, by Jerry Lemelson, a prolific inventor who holds more than 500 patents.

"SOS has a good track record with taking ideas and working with existing companies to bring inventions to the market," says Brenda Philips, director of the Lemelson National Program. "One of our goals is to get liberal arts colleges more involved in this type of project work, and Evergreen provides a successful model that nontechnical schools can use."

Faculty members Judy Bayard Cushing and Ginny Hill created the Student Originated Software program, originally called Business of Computers, in 1983. The program has always pushed software development out of the realm of theory and into the realm of practice. Some students come to class with a project in mind, some with a client in mind and others use projects suggested by Cushing and other faculty members on the SOS team.

During the year students deal with everything from technical problems to the delicacy of group creativity. They also accumulate skills as they gain in-depth practical experience in the planning, management, design and implementation of a software project.

Students in the 1995-96 SOS program are working on projects ranging from an interactive CD-ROM adventure game for children to a UNIX security firewall. Clients include the Jet Propulsion Lab, the Wind River Canopy Crane Facility, the Washington State Emergency Management Center, the Speakeasy Cafe in Seattle and the Pacific Northwest Laboratories' National Environmental Molecular Science Lab.

"Companies have a very practical and important reason for wanting that year-and-a-half of experience," says Thad Curtz, who teaches the 1995-96 program with Cushing. "There's a huge gap between what you're likely to know when you come out of the standard computer science program and what you need to know for working on a real-life project."

'There's a huge gap between what you're likely to know when you come out of the standard computer science program and what you need to know for working on a real-life project.'

– Thad Curtz

Except for two years when she returned to graduate school, Cushing has taught the SOS program every other year since its inception. She has teamed up with several other faculty members, including Lucia Harrison, Hill, Duke Kuehn, David Paulsen and Art Mulka. Cushing has always provided the computer support for the program while Curtz and his predecessors have provided other areas of expertise.

This mixing of computer know-how with other forms of expertise is another way SOS brings computer programming and the issues that surround it out of academic isolation. "Software development is an inherently interdisciplinary activity," Cushing says. "It has to be. Many of the people coming from computer science programs at larger universities can have a somewhat narrow focus. That's not to say that the programs are bad, but the way software affects us is becoming more and more profound as it becomes increasingly integrated into the workplace. Liberal arts people will offer a good perspective on that work."

Curtz describes himself as a longtime amateur programmer and jokes that he came to the program so he could hang out with software engineers. But as computers become an integral part of the workplace and the home, Cushing and Curtz see an increasing need for programmers that come out of synthesized, interdisciplinary programs.

While Cushing and Curtz work together as sort of project managers, Curtz says the process is less like being a boss and more like "herding cats." The faculty members are there to help, not necessarily direct a project for a specific company's benefit.

"There are a lot of things that we're interested in having students worry about," he says. "If the students can deal with the complications, they can learn a lot about the process in mastering them. Of course, they can also get into bigger trouble."

Pat Yamaura '88, has experienced two distinct types of computer programming education. After two years of preparing for a computer science degree at the University of Washington, he learned he couldn't become a computer science major without being placed on a waiting list. Yamaura transferred to Evergreen, enrolled in Data to Information in 1985 and then followed it with a year in Business of Computers. Yamaura's team designed a reservation and registration system for the Washington Parks Department.

Today, Yamaura is a systems architect at PHAMIS, Inc., a medical information services company in Seattle. He says the structure and background education he experienced at the University of Washington gave him a strong base from which to launch a project of his own, but working with a team wound up being the perfect outlet for his ideas and theories. "I was far better prepared to go through the entire design process. The course allowed me to put everything I learned into context. I could have gotten a degree in programming, but without ever actually going through the process, I doubt if I would have gained as much," Yamaura says. "From scoping out the project design to talking to users, we took on the whole thing, the entire methodology of developing software."

Programming projects coming out of SOS have become more complex during the past 13 years. Students now come to SOS with greater in-depth knowledge of computers and there are more "pre-manufactured" programmed components that students can integrate into larger projects. Cushing says it's the program's ability to stay on the cutting edge that keeps it fresh.

"Every year the environment changes," she says. "A database that once would have taken two whole quarters to develop can now be done in three weeks and is just a part of a larger project," Cushing says. "I don't know where it's going or where I want it to go — or where students will take it."

GreenerNews

Growing into the night
(and weekends, too)

Evergreen's Part-Time Studies program for adult students is planning to grow by leaps and bounds beginning this fall. It is expanding to give adults who work during the day an opportunity to enroll in half-time programs in the evenings and on weekends. This year, the three-year-old program enrolled just over 150 students in half-time programs. Next fall, more than 250 new students are expected to enroll, bringing the total Part-Time Studies enrollment to more than 400.

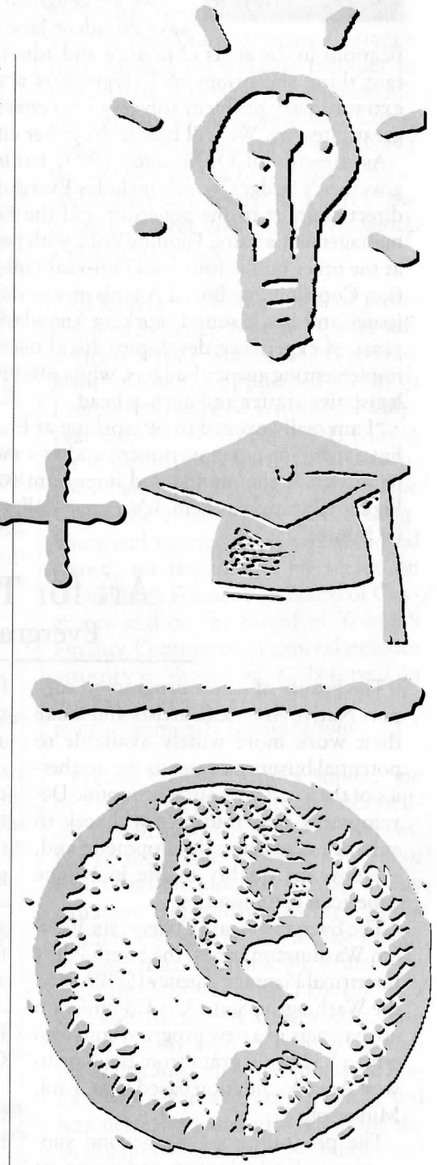
Part-Time Studies programs are generally team-taught by two or three faculty. Content is interdisciplinary. In addition to eight-credit programs, individual contracts are available for students who consult with their program faculty early in their educational planning.

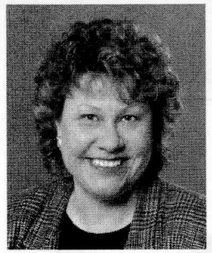
The growth in part-time enrollment is the first step in Evergreen's effort to do its part to meet a fast-growing demand for a baccalaureate education in Washington. The state's Higher Education Coordinating Board is using the word "crisis" to describe the outlook for college enrollment over the next 15 years. Population forecasts show the state will grow dramatically. Meanwhile, the K-12 system — which has been growing for years from the "baby-boom echo" and immigration — is carrying a huge wave of students toward high school graduation. This means increases in traditional college-age students will far exceed increases in overall state populations over the next five to 10 years. After this initial bulge, enrollment demand is expected to increase at a less dramatic rate. Projections also include adults who've indicated through surveys an interest in returning to higher education.

The HEC Board, in developing a long-term plan, told colleges to think about how they could meet this enrollment challenge with minimal new costs. An important part of Evergreen's solution is to look at the night, and focus close to home.

This spring Evergreen sent more than 190,000 surveys about people's educational interests into the five counties surrounding the college and got a high level of response. Management and social services/psychology courses received the most interest and, overall, the survey demonstrated high demand for part-time evening programs.

Anyone interested in learning more about Evergreen's Part-Time Studies program should contact Wanda Curtis, educational outreach coordinator for Part-Time Studies, at (360) 866-6000, ext. 6164.





Fanning is New VP

Ruta E. Fanning, formerly the director of the Washington State Office of Financial Management, is Evergreen's vice president for Finance and Administration. She began her new job March 15, filling the position left open by T.L. "Les" Purce, who became a vice president at Washington State University in August.

"We are delighted and honored Ruta decided to join us," says President Jane Jervis. "She brings outstanding qualifications in the areas of finance and administration, but I'd say the most important thing she brings to Evergreen is a seemingly universal reputation as an extraordinary problem-solver, with a consistently straightforward approach and great integrity. We will benefit from her enthusiasm, as well as her expertise."

As director of OFM since 1993, Fanning oversaw the preparation of the governor's budget, which includes Evergreen's funding. In addition to providing direct support to the governor and the Legislature for statewide financial and management affairs, Fanning dealt with people at Evergreen, presidents and staff at the other public four- and two-year colleges and the staff of the Higher Education Coordinating Board. All this means she's very familiar with state educational issues and has a sound working knowledge of the campus. Fanning also brings years of experience developing fiscal management policies and monitoring and implementing agency budgets, while offering a wealth of experience working as a legislative staffer and agency head.

"I am really excited to be working at Evergreen," Fanning says. "In the years I have spent in state government and as a member of this community, I have come to recognize the unique and important role that Evergreen plays in our state's higher education system. It's a great college, and I look forward to helping build its future."

Target Supports Expressions

The Evergreen Expressions performing arts series received a $1,500 grant from the Olympia Target store to support this year's performance lineup. Expressions offers high-quality dance, music and theater presentations featuring a diversity of performers. This year's performers included a prominent African American dance troupe, Native American traditional theater, dancers and musicians of Bali and much more.

The Target grant is part of the company's longstanding commitment to give 5 percent of its annual taxable profits to community organizations.

New Piano

An upright piano that sounds like a grand now resides in the Communications Building, thanks to an anonymous donor. Proceeds from performances by performing arts faculty and staff also contributed to the Piano Fund.

Art for Tribal Economic Development

Evergreen and Tribes Launch Partnership

The beauty of a new program to support Native American artists and make their work more widely available to potential buyers transcends the aesthetics of the art. The Native Economic Development Arts Initiative will seek to enhance economic development and, thereby, the quality of life in Native American communities.

The Evergreen State College, six Western Washington tribes, the South Puget Intertribal Planning Agency (SPIPA) and the Washington State Arts Commission are partners in a new program launched with a $325,000 grant from the Northwest Area Foundation based in St. Paul, Minnesota.

The program goes far beyond supporting individual artists and giving art enthusiasts easier access to a wide range of Native art. Plans include supporting tribal governments as they set up programs to revive lost artistic techniques, further enhance the teaching of traditional artistic styles and support artists and their efforts to reach markets.

For people who collect Native American art, the highlight of this project will be a catalog of artists that describes their work through words and photographs. The catalog will appear in print and over the World Wide Web. The program will also create a clearinghouse for artists work that will serve galleries and major gift shops. Two heavily promoted annual art sales, including one in Evergreen's Longhouse Education and Cultural Center, will be offered each year.

The program will develop a series of business management workshops to teach artists and tribal members about small-business practices related to art.

For Evergreen, this effort is the first major initiative that falls within the vision of the college's new Longhouse Education and Cultural Center, built to support Native American and multicultural education programs and to bring people of different cultures together while providing multicultural programming for surrounding communities. The Longhouse coordinator, Tina Moomaw, will play a critical role in implementing several aspects of the grant program.

Evergreen helped develop the grant program in close partnership with a consortium of five tribes: the Nisqually, Squaxin, the Confederated Tribes of the Chehalis, Shoalwater Bay and the Skokomish. In addition, the Port S'Klallam Tribe will participate in the project. The Washington State Arts Commission is also helping coordinate the program.

Initially, the program will focus on these six tribes, but plans involve eventually expanding services to tribes throughout the Northwest.

Arms and Public Safety

Evergreen's Public Safety officers will soon have access to firearms, following a decision by the Board of Trustees.

Each of the seven board members described their personal struggles to come to a decision on arms during the February 14 regular meeting. They then voted 5-1 to accept President Jane Jervis's recommendation to give campus officers limited access to firearms.

After the vote, about 80 students staged a protest.

A collegewide survey completed as part of the process leading up to the vote showed sentiment about arming was evenly divided.

The trustees voting in favor of the president's recommendation said they were motivated by realities off campus. They were primarily concerned about the steadily increasing response time for armed backup by the Thurston County Sheriff's Office, coupled with a belief that the college should take responsibility for armed security on campus. Board members and college administrators said Evergreen's campus is generally safe and the move to limited arming was made to ensure it stays that way.

The decision calls for a comprehensive training program in addition to the training campus officers already receive. There will be a community review committee to examine any calls for armed response, and any situations in which an officer draws or uses a weapon.

The board called for charging a task force to explore how, when and where officers would have access to firearms. The processes leading to a final decision by Jervis will continue until June.

The issue of arming officers is not new to Evergreen. In 1989, the state Department of Labor and Industries cited the college for creating unsafe working conditions for safety officers. In 1992, following a consultant's report and a public process, the board approved a training and certification program to make campus officers commissioned police officers, but stopped short of arming officers.

The process that led to the board's decision to give officers limited access to firearms began with a report by Thurston County Undersheriff Neil McClannahan '74, who was then interim director of Public Safety. The report outlined how population increases in Thurston County mean the Sheriff's Office cannot guarantee a response time of less than 15 minutes to potentially violent crime situations.

Art Costantino, vice president for Student Affairs, worked with two student representatives to the board to design a process for community input that began in November. Costantino submitted a report to Jervis, who then made her recommendation to the board.

Both Jervis and Costantino concluded that 15 minutes is too long to wait for an armed response.

Another consideration was the desirability of ensuring that armed officers responding to on-campus incidents are familiar with the campus, its inhabitants and the values of the college. The safety of the college's Public Safety officers was also a primary concern.

New Public Safety Director

Steve Huntsberry is Evergreen's new director of Public Safety. A commissioned police sergeant at Washington State University since 1980, Huntsberry began his new job in March.

Over the past eight years, Huntsberry has traveled the country as a consultant and keynote speaker specializing in library and museum security. He says he believes that communication, education and cooperation should be the backbone of a campus safety department, and that the close-knit nature of a college system requires a community-oriented philosophy of law enforcement, which he will emphasize as Evergreen's chief public safety officer.

Passings

On November 29, more than 100 current and former Evergreeners gathered in the Longhouse to remember **Keith Coker**, who died November 8. He was among Evergreen's first employees, back when the community was smaller and faculty and staff across campus were focused on working together to build something new and wonderful. Several faculty and staff said Coker helped fix, build and repair so much of the campus during his 20 years in Facilities that he'll always be a part of the campus. Coker died from toxic shock and a heart attack.

Ed Kelly, chair of the Board of Trustees, died Saturday, March 30, after suffering a stroke March 24. Governor Booth Gardner appointed Kelly to Evergreen's Board of Trustees for a six-year term in November 1991. During his tenure on the board, Kelly was involved with the hiring of President Jane Jervis, the construction of the Longhouse and a period of revitalization and growth for the college. He served on the college's Foundation Board of Governors and on the Board of Trustee's Finance Committee. A general practice attorney in Vancouver, Kelly served on numerous boards and was involved in many community organizations.

Faculty member **Sandra Simon**, one of Evergreen's great wits and storytellers, passed away December 18. A member of the faculty since 1973, Simon could find the humorous detail in any situation. Her teaching focused on the written and spoken word. She taught in numerous academic programs, including The Writing Process and Hannah Arendt: A Celebration, and advised many aspiring writers through programs and individual contracts. Humor was never far from her mind, and was even the focus of a program she co-taught called Stand Up Comedy and Sit Down Humor. Her final academic program was Human Condition.

AlumNews

New Evergreen Adventure Travel Program Offers Trips to Thailand and Mexico

Alumni now have the opportunity to share adventure travel opportunities with one another on trips led by individuals who "have been there ... done it ... seen it." Recreation and Wellness, in conjunction with the Alumni Association, is sponsoring a new program to organize group travel to less-developed countries. This travel series is aimed at providing the Evergreen community, especially alumni, with yet another alternative for bonding and learning.

Alumni can look forward to trips that offer a diverse assortment of activities. Examples include: flying, traveling by exotic vehicular and animal transport, mountain biking and bicycle touring, seminaring, writing, photographing, trekking, camping, climbing at high altitudes, sailing, swimming, shopping, eating, skiing, rafting and spelunking — or any combination of these. The program will offer four categories of adventure: category one (easy) trips involve mostly eating, sleeping, walking and sitting; category two (moderate) trips will include walking, moderate exercise and camping; category three (physical) trips require physical stamina; and cate-gory four (extremely physical) trips are physically demanding with lots of adventure.

Two trips are currently offered. In July 1996, alumni can spend three weeks in Thailand, exploring Bangkok, traveling to Chiang Mai and Chiang Rai via train and taking a bus to a trek in the mountains. The trip will end with rest and relaxation on the beaches of Ko Samai — all in the company of former Greeners. This is a category 2-3 trip with an approximate cost of $1,550-$1,950 (includes transportation, lodging, food and personal expenses).

For the Greener looking for a challenging experience, a category 3-4 trip is being offered in January 1997. Adventurers on this trip will climb Popocatepetl, Mexico with experienced group leaders. Popocatepetl, or "Popo," is nearly 18,000 feet in elevation and is situated about 50 miles east of Mexico City. It is popular among mountaineers because it is high, yet offers fewer objective risks than other Northern Hemisphere peaks. Approximate cost for this trip is $650 (does not include mountaineering gear and personal equipment).

All trips in the program will be organized by individuals who know the destination area and have proven they can organize a safe and satisfying experience for all participants. Only qualified well-trained leaders conduct trips.

To receive a brochure or more information about Evergreen Adventure Travel Trips, please call (360) 866-6000, ext. 6547 or write Adventure Travel, CRC 210, TESC, Olympia, WA 98505.

Alumni Association Honors Alumni Working in Washington State Legislature

On February 15, the Alumni Association highlighted the contributions of talented Evergreen alumni who work in and around the state Legislature. Nearly 50 people attended a reception at the Washington State Capitol. Many state senators and representatives and Governor Lowry turned out to meet Evergreen alumni and President Jane Jervis.

The alumni board members who jointly coordinated the event, Tani Lindquist '91 and Andy Colvin '91, noted that the event is a promising start to building increased visibility for Evergreen and its alumni among legislators. The Alumni Association plans to hold this event annually. If you work on or around the Hill and we missed you, we would appreciate hearing from you.

Political Ecology 25-Year Program Reunion

Members of the 1971-72 Political Ecology program will celebrate their 25-year reunion on campus June 14-16. The reunion committee, led by faculty member Oscar Soule, has a full lineup of activities planned, including several social events, seminars and a dinner with special guest speaker Jolene Unsoeld on Saturday night. The reunion committee is also preparing a reunion memory booklet for all program members. Anyone wishing to receive more information about the reunion can call Alumni Affairs at (360) 866-6000, ext. 6551 or send E-mail to tescalum@elwha.evergreen.edu.

'25 Years' Alumni Art Exhibition

The Evergreen Galleries will host '25 Years,' a mail art exhibition, in October as part of the 25th anniversary celebration. Alumni artwork will visually document the college's history and should deal with memories, events or reflections of time at Evergreen.

The exhibition is open to all alumni. Artwork can be in any media, but it needs to be sent through the mail or by fax machine and received by September 6. Please include your name and years attending Evergreen. No work will be returned; all work becomes the property of The Evergreen State College. Mail submissions to: The Evergreen Galleries, 25 Years Mail Art Exhibition, The Evergreen State College, Olympia WA 98505. Or fax it to (360) 866-6794, attention The Evergreen Galleries, 25 Years Mail Art Exhibition.

For further information contact Peter Ramsey at (360) 866-6000, ext. 6488.

Alumni Gear Up for Super Saturday, June 15

Mark your calendars now

Alumni Breakfast — all Greener Grads, their families and friends are invited. What better way to start Super Saturday than to join fellow Greener Grads at the Alumni Breakfast? Don't miss this chance to gather with fellow alums, learn about the Alumni Association and elect members to next year's Alumni Board. Breakfast will begin at 10 a.m. in the campus Greenery. Take the time to meet other Greeners and get reacquainted with friends. A healthy breakfast costs $5 at the door.

The Alumni Association will top off breakfast with an annual meeting and election of new board members. All Evergreen graduates are automatically members of the Alumni Association and have an important voice in alumni programs and services. Current board members will be in attendance at the meeting, so let them know your interests and ideas.

Geogear Merchandise Booth

From T-shirts to bumper stickers, opportunities abound to show your true colors. Umbrellas and shorts have expanded the line of quality, practical alumni clothing and Evergreen logo merchandise. Stop by the Geogear booth on Red Square to purchase your Geogear and help support your Alumni Association.

Nostalgia Exhibit

Evergreen's history comes to life in the nostalgia exhibit, located in the Library, second floor foyer. The exhibit is courtesy of Evergreen Archivist Randy Stilson and the Evergreen Library.

Greener Lounge

New this year — free admission to the beer garden until midnight! Take advantage of free admission to the Greener Lounge and beer garden, from 8 p.m. 'til midnight in Library 4300. Catch up with friends in the laid-back ambiance with music, board games and a new collection of microbrews. Please bring ID. Games and lava lamps are welcome.

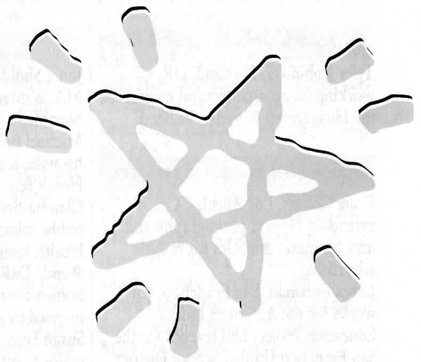
Alumni Association Seeks Board Members

Elections to be held at June 15 Annual Meeting

Alumni Association Board members play a vital role in shaping activities, programs and events for all Evergreen alumni. The Alumni Association exists to keep Greener Grads connected with Evergreen and in touch with one another. Therefore, board members also represent the general alumni body regarding issues at the college that affect or are of interest to graduates. Board members are involved with programming to serve alumni, to promote the well being of the college and — best of all — to have fun.

Nominations are being sought for several vacant positions for 1996-98 terms of office. Any Evergreen graduate is eligible to run for a seat on the board and self-nominations are welcome. Elections will take place at the Alumni Association's annual meeting on June 15, immediately following the Super Saturday Alumni Breakfast that begins at 10 a.m.

To learn more about being a board member, contact Alumni Association President Andrea Bowers at (206) 545-9103 or Alumni Affairs Director Valerie Manion at (360) 866-6000, ext. 6552 or by E-mail at manionv@elwha. evergreen.edu.



AlumNotes

1972

Tyler Robinson, Portland, OR, is working on an architectural project for the High Desert Museum in Bend.

1973

Craig Collins, Los Angeles, CA, is extending beyond photography and into computer graphics for fashion advertising.
James Forsman, San Francisco, CA, works for the American Indian Education Project and teaches for the San Francisco Unified School District.
James Mead, Yakima, recently moved to Yakima.
Daniel Swecker, Rochester, is executive director of the Washington Fish Growers Association and was appointed to a seat in the Washington State Senate, District 20.
Herbert Young, Lynnwood, works for long-term mental health services at the Emergency Service Center.

1974

Jonathan Cruz, Goleta, CA, along with his wife Tess, '73, had a baby girl, Hannah, on February 7.
Diana Deutsch, West Hills, CA, has worked at the same job for 17 years.
Alain Herriott, Burns, OR, received Qigong instructor certification from the College of Oriental Medicine.
Merry Kogut, Tacoma, an attorney, was recently appointed to establish the Rules and Policies Assistance Unit of the WA Department of Social and Health Services in Olympia.
Richard Matchette, Fairfield, CA, is a techno-dweeb for an Internet service provider.
Martin Joseph Oppenheimer, Seattle, a cinematographer, is the owner and president of Seattle's Oppenheimer Camera.
Margaret Wharton, Rochester, enjoys retirement.
Mary Schroeder, Seattle, works in a middle school and expects to be awarded an M.A. in school counseling from Seattle Pacific University in June.

1975

Janet Sholder Durgin, Mount Hermon, MA, is director of curriculum at Northfield Mount Herman School.
Michael Bristow, Seattle, along with his wife, Karen, and their Cajun band, How's Bayou, put out a new CD.
Claudia Brown, Portland, OR, is a public relations specialist at Legacy Health Systems.
Wendy DeRaud, Fresno, CA, is a homemaker with three children and is married to a fine artist.
Susan Feiner, Portland, ME, received a major grant from the National Science Foundation and published an article in *American Economic Review*.
Julie Frederick, Seattle, took a two-month trip to Bali, which enhanced her perspective on the world and cultural views.
Laura Goff, Puyallup, is busy counseling older adults.
Ellen Gordon, Oakland, CA, has a graphic design business in Berkeley and a 9-year-old daughter.
Michael Harding, Vancouver, is married to Peggy Morrison.
Norman Levy, San Francisco, CA, has two children, is happy to be alive and is wondering where his friends from Evergreen are.
Kenneth Linkhart, Seattle, is an engineering director working with diagnostic ultrasound equipment for System Architecture Group, Advanced Technology Labs.
Ronald Magram, Vancouver, is self-employed in financial planning.
Tiare Mathison-Bowie, Eugene, OR, is a Presbyterian minister with a 2-year-old son, Isaac.
Bernice Morehead, Tacoma, received an M.B.A. from City University.
Carol Ramswick, Vista, CA, reports she is "married with two kids, lives in suburbia, is mortgaged up to the ears, and remembers Evergreen fondly."
Steven Simpson, Port Townsend, earned his Ph.D. in communications at the University of Washington and is teaching English and journalism at Port Townsend High School. He is president of the on-line educational publishing company he started last year, Class IV Publications, and can be reached via Class IV's home page: http://www.olympus.net/classIV/.
Marvin Wright, Sacramento, CA, enjoyed a very busy 1995: he earned an associate of science degree in computer science from Heald Institute of Technology in January, was hired by Packard Bell as a computer technician in the Surface Mount Technology department in August, and celebrated ten years of marriage to Olivia S. Guebara in November.

1976

Arnold Aosved, Puyallup, opened his own business, Virtual Advertising.
Patrick Barber, Seattle, is a film and video editor.
Donald Case, Lexington, KY, is a professor at the University of Kentucky.
Lawton Case, Enumclaw, was appointed director/manager of the Enumclaw Kiwanis Food Bank, where he had served as coordinator since his disability retirement from the Enumclaw Police Department eight years ago.
Daniel Deprez, Portland, OR, is the author of *31 Days at a Time: Daily Meditations for the Serenity Impaired*.
Pamela Farr, Olympia, earned her Ph.D. in education from the University of Washington in March.
David Arthur Holmberg, Bend, OR, is enjoying life. He is vice principal at Mountain View High School and owns a cattle ranch with his wife.
Richard Jones, Tumwater, earned his M.A. and is counseling at Yelm High School.
Kathleen Jordan, Olympia, a former Evergreen employee who did many wonderful things for the college and for Olympia, died of lung cancer January 22 at the age of 53.
Eric Krieger, Stoneridge, NY, a photojournalist, recently photographed Bill Clinton and Boris Yeltsen having lunch.
William Mahan, Port Orchard, says "Go Geoducks!"
John McCarthy, Salt Lake City, UT, has two kids.
Thomas Nelson, Olympia, is designing and building houses.
Karen Plaskow, Montclair, NJ, is teaching in New Jersey's only public Montessori school.
Kathy Rich, Kent, earned an M.A. in psychology at Antioch College. She is a therapist at Good Samaritan Outreach and hopes to run her own private practice.
Catherine Riddell, Portland, OR, is a research analyst for Oregon Health.
Lawrence Shlim, Portland, OR, had a photography piece accepted by the Seattle Art Museum's permanent collection.
Ron Smoire, Culver City, CA, is a chef in L.A. He opened a pan-American restaurant in Paris, France and has cooked for Bill Clinton.
Janet Stonington, Louisville, CO, is a physician's assistant at Community Medical Associates.
Lynda Weinman, Glendale, CA, had her first book, *Designing Web Graphics*, published by New Riders Publishing.
Arthur Whitson Jr., Bainbridge Island, works at Boeing.

1977

Victoria Randlett, San Francisco, CA, is completing her Ph.D. in geography at the University of California at Berkeley.
Henry Selkirk, LaHonda, CA, is a meteorologist for the NASA Aimes Research Center.
Michael Cohen, Putney, VT, is president of Snow River Wood Products in Brattleburg.
Andrea Dashe, Olympia, is engaged to marry **Kevin W. Roy** '94, who works for a Seattle-based construction company.
Leigh Francis, Seattle, passed away unexpectedly in February due to complications from a heart attack. She was a senior planner for the City of Seattle's Department of Construction and Land Use.
Ellen Henderson, Seattle, has a 6-year-old son, Ross, and a 3-year-old daughter, Maggie, who is a delight, as is Ellen's husband.
Nancy Hewitt, Gig Harbor, works for a private company in Tacoma and lives with her three sons.
Laurie Jubas, Grants Pass, OR, is very excited about starting a horse-breeding farm.
Ralph Kile, Vancouver, opened his own business, R.O.K. Tax and Bookkeeping.

Sally Marquis, Seattle, works at the Environmental Protection Agency.
Thomas McLaughlin, Las Cruces, NM, went back to school to study agriculture.
Thomas O'Connor, Port Townsend, recently returned from China, where he worked for the Chinese Economic News Service and the Taiwanese Council for Planning and Development for 15 years.
Leslie Woodruff Owen, Bethesda, MD, is still in Washington, D.C. with her husband, **Joe Dear** '76, and two kids, 4-year-old Annie and 7-year-old Ben. She is working part time for an employment discrimination lawyer.
Susan Richards Donner, Santa Rosa, CA, is self-employed, teaching, trying to establish a middle school and still finds time to be a mom.
Theresa Ryken, Olympia, and her husband Jeff adopted a baby girl, Claire, in 1994. Theresa anticipates starting a private practice in psychological counseling next year.
Patti Simon, Seattle, has a daughter in kindergarten and is the assistant director of midwifery at the Seattle Midwifery School.
Gregor Smith, Tacoma, works at finding employment for the disabled.
Kenneth Waits, Vashon Island, lives with his wife, Anne, and their four children on a 2 1/2-acre farm where they raise milk goats.

1978

James Edwin Adams, Olympia, is earning a Ph.D. in environmental studies.
Steven Baris, Philadelphia, PA, is an art instructor.
Wayne Cantrell, Fife, is alive, doing well and eager for a second chance at life.
John Michael Ernst, Colton, OR, is trying to establish a cohousing group.
Daniel Farber, Olympia, has an 8-year-old son, Zachary, who is the world's most knowledgeable baseball fan.
Glenn Huntley, Portland, OR, a research assistant at Portland State University, is working on an M.A. in public administration.
B. Parker Lindner, Seattle, earned an M.A. in public administration at the University of Washington. She is on the board of directors of the ACLU, and is the vice president of Electra Coalition for Electronic Democracy.
Nancy Luenn, Yakima, is author of *Mother Earth, Nessa's Fish* and other books for children. In October, 1995, she was the recipient of a Governor's Writers Award for her picture book *Squish! A Wetland Walk*.
Anne Lunt, Shelton, sent a manuscript called *School* to a publisher. Anne collected many interviews about the word "school" while at Evergreen.
Carol McClellan, San Francisco, CA, is a self-employed bookkeeper.
James Sayce, Ocean Park, is expecting a baby in July. A cranberry farmer, he invented an amphibious machine to sand cranberry bogs and was named director of the Coastal Resource Science Center.
Michael Whitson, San Francisco, CA, director of San Francisco's 848 Community Space, recently won the Focus Freedom of Expression Award.
Christina Dubois, Vashon, is the managing editor of *Columbia* magazine.
Carol Maynard, Colorado Springs, CO, had a baby girl, Tela, on October 15, 1994.
Aaron Sonego, Marina Del Rey, CA, is a news cameraman for "E" channel and a freelance videographer. Aaron wishes everyone at Evergreen a great year.

1979

Janet Balaban, Olympia, is a care manager at St. Joseph's Hospital. She has three children and is married to **Tom Balaban** '79.
Jean-Pierre Bressieux, Boulder, CO, is in a new business, Cell Tech, dealing with organic food.
Paul Brogger, Olympia, has a daughter attending Washington State University. His eldest son is at South Puget Sound Community College and hopes to transfer to Evergreen.
Carey Concannon, Mercer Island, earned her M.A. in poetry and has a dog named Fergus.
Robert Densmore, Woodacre, CA, is teaching middle-school sciences, raising two children and enjoying life.
David Dill, Cloverdale, OR, bought a greenhouse.
Charles Ericksen, Ladysmith, WI, received a Kellogg Fund three-year fellowship and a grant from the Kellogg International Leadership Program to work with indigenous cultures and community education in Africa, Central America and South America.
Steven Kernes, Brunswick, GA, is chief of program management at the Federal Law Enforcement Training Center and invites alums passing through to stop and take a tour.
Cynthia Knudsen, Olympia, works for the WA Fish and Wildlife in the otolith lab. She founded Friends of the Fiddle and still plays the fiddle.
Scott Miller, Kirkland, and his wife have three children.
Chris Nelson, Greensboro, NC, says "Hi to everybody" from North Carolina.
Timothy Pearce, St. Paul, MN, went to the island of Madagascar to collect land snails as a post-doctoral study after earning his Ph.D. in December 1994.
Roo Slagle, Belvidere Center, VT, owns a natural food store, Roo's Natural Foods.
Leslie Staub, New Orleans, LA, is showing her collection of art, "Icons from the Church of the Soul," in L.A., Manhattan and New Orleans.
Ellen Marshall, East Thetford, VT, is a proud parent of Owen Marshall, born December 11, 1994. She is a consultant in organization development, which consists of system diagnosis, strategy planning and staff coaching. Ellen wants alumni to go on line.
Edith Wallace, Tacoma, started the Pacific Northwest Grandparents Raising Grandchildren Coalition, a support group to increase public awareness and serve as an advocacy group for public education.
James Lewicki, Westby, WI, is a teacher. He and his wife, Renee Buss, a former Greener, have four children and are expecting a fifth.
Patrick Williams, Berkeley, CA, is research associate at the University of California Seismographic Stations and adjunct professor of geography. He is continuing his studies of the landforms and geology of active fault motions in the Bay Area.
Ann Wright, Snyder, NY, teaches at Canisius College in Buffalo.

1980

Harriet Arnold, Silverdale, is working on her M.A. in school administration at Seattle Pacific University.
Michael Barron, Wilmington, NC, is working on his M.B.A.
Michael Cohagen, Battle Ground, and his wife, **Pamela Cohagen** '80, went back to school at Concordia College for their certificates in geriatric social work, and both work at Columbia River Mental Health Services. They have two sons.
Elizabeth Colwill, San Diego, CA, and Peter Arnade are the proud parents of a son born December 28, 1995. She is an associate professor of history at San Diego State University.
Christopher Dupre, Silver Spring, MD, and his wife Herma have a 14-month-old daughter, Elsa.
Michael Henry, Malden, MA, is a tax manager at Coopers & Lybrand.
Lyda Hunt-Alexander, Vancouver, says "It's always good to be around Greeners; it reminds me of why I think like I do."
Karen Kramer-Farris and **Thom Farris**, Port Angeles, are broker/owners of Columbia River Farms, established in 1982 to export Washington apples to Israel. They have a 13-year-old daughter and a 6-year-old son.
Dawn Lowenthal, Maui, HI, is happily living with her teenage daughter.
Margaret Millard, Graham, NC, teaches fourth grade.
Daniel Tolfree, Graham, NC, is organic farming.
Martin Veveris, Buffalo Grove, IL, is alive and well, making art and providing therapy.
Robin Wiggin, Portland, OR, has two children: 6-year-old Gillean and 3-year-old Barrett. Robin lives in the Hawthorne area of Portland and is interested in getting together with or hearing from old friends.
Janet Wolfram, Olympia, is a registered nurse and a certified diabetes educator, as well as a Girl Scout troop leader.

1981

James Barrett, Savannah, GA, is active in the Georgia Botanical and Audubon Societies.
Craig Bartlett, Glendale, CA, created and is executive producer of an animated series called *Hey Arnold!* for Nickelodeon, expected to premiere in the fall of 1996.
Karen Berkrot, Rye, NH, is a freelance writer and artistic director for New Voices Theatre.
Thomas Buell Jr., Pittsburgh, PA, is a freelance writer and living with his wife, Dorey Whealan-Buell, who was a Greener.
Patricia Cox, Olympia, creates icons.
Pamela Dales, Seattle, is a physician's assistant at Seattle's Pac Med.
James Doble, Union, ME, and his wife Mimi, have a baby boy, Gabriel.
Carol Ellick, Tucson, AZ, completed a grant contract for the state of New Mexico, facilitating archaeology workshops for teachers in grades four through seven.

Holly Hill, Seattle, has a daughter named Lucy.
Tod Johnson, Winthrop, is married, writes environmental statements and works on Canada Lakes impact plans.
Shari Kaufman, Seattle, is married to **Michael Barrons** '80, and has two children, 8-year-old Zachary and 5-year-old Laura.
Steven Noll, Spokane, is a member of the 1996 Leadership Spokane class.
Mark Painter, Dallas, PA, is an assistant professor of philosophy at Misericordia College. He and his wife Megan have two children, Maia and Marnia.
Melissa Parker, Spokane, wants to get together with other Spokane alumni.
Lisa Rigney, Iowa City, IA, is an ecologist for the University of Iowa. She is married to **Steve Masciali** '81, who works in remodeling.
Barbara Roder, Olympia, has been serving on the Olympia School Board for the last 14 years and will be president of the Washington State School Directors Association.
Rusty Roessler, Snohomish, is production manager for Peter Pan Seafoods, Inc., spending half the year in Alaska and half the year in Seattle. He lives in a house designed by **Mary Young** '79. Barbara and Rusty are still married after 25 years and their son, Chip, who was an Evergreen daycare pupil, attends college in Bellingham. Rusty has been able to travel to Japan, Europe, Mexico and the South Pacific, all, he believes, due to his Evergreen experience.
Wendy Sayan, Seattle, is an instructional paraprofessional in an alternative high school program. She and husband, **Dan** '77, have three children.
Candace Street, Seattle, went to the MacDowel Colony for the Arts and the Edna St. Vincent Millay Colony for the Arts as a fellow in poetry.
James Thomas, Seattle, hopes to publish his book, *The Shaman and the Disco, Dreams and Masculinity*.
Gary Thompson, Seattle, is a full-time real estate agent with Windermere Realty. He and wife Kitty have a 5-year-old son, Connor. He is very happy and loves life.
Claire Tinkerhess, Ann Arbor, MI, is working on her masters in conflict resolution at Antioch University.
Leslie Thorpe, Seattle, is writing a screenplay on Capitol Hill.

1982

Jefferson Allen, Seattle, established a general contracting company with fellow alum **Ian Brown**, '84.
Shelley Susan Baxter, Minneapolis, MN, is a regional impact economic consultant. She married Ray Klebba in 1994. Her passion is windsurfing, and she spent her summer windsurfing at the Columbia River Gorge.
Laurel Boyajian, Portland, OR, is enjoying life as an "unschooling" mother for her 6-year-old daughter, Clarissa. She does acupuncture from her home and is prospering in network marketing.
Carol Christianson, Madrid, NM, is relocating to Seattle. She graduated with an M.A. in counseling from Southwestern University.
David Czaja, Winsted, CT, and his wife Elaine are expecting their first child.
Kurt Danison, Okanogan, is running a small business in city planning and was elected first vice president of the Planning Association of Washington. He has a 3-year-old daughter, Sophie.
Kimberly and **Mike Finger**, Bellingham, had a baby girl on March 28, 1995.
Elizabeth Frey, Elma, is moving into the house she built.
Christopher Gibson, Issaquah, earned his J.D. *cum laude* from the Seattle University School of Law in May, 1995.
Stefanie Hare, Seattle, is a marketing director at Woodland Park Zoo.
Jennifer Kunz, Norwalk, CT, has a 7-month-old daughter, Anna.
Amelia Levinson, Olympia, has a KAOS reggae show Friday mornings, writes for the reggae magazine *Forward*, and has three children.
Linda Mathews, Olympia, had three pieces of poetry published and did her first voice-over on a cartoon.
Martha McCartney, Phoenix, AZ, is a research scientist at Arizona State University.
John McGee, Olympia, was elected president of the Olympia School Board in November 1995 and continues to work in Evergreen's Computer Center.
J.J. Newman, Auburn, AL, is working on her Ph.D. at Auburn University.
Craig Smith, Hadlock, coaches two high school soccer teams.
Tamara Tocher, Olympia, has two sons, 9-year-old Joe and 4-year-old Sam.
Randell Weeks, Olympia, is the proud father of Olivia June and her brother Elliot.
Marc Zaller, North Attleboro, MA, is vice president of sales and marketing at World Courier. He and wife Aurora have a 12-year-old son, A. J., and a 9-year-old daughter, Elisa.

1983

Jeffrey Bruton, Seattle, completed his M.A. in music technology in 1994. He is manager of enabling technologies at Spectral, Inc., a manufacturer of digital audio workstations.
Baylor Capers Jr., San Francisco, CA, is a discharge planner at Belmont Hills Hospital.
Kimberly Cooper, Bolinas, CA, is doing habitat restoration for the National Park Service at Point Reyes National Seashore, raising two children and learning to surf.
Karin DeDona, Richfield, opened her own law practice in September, 1993.
Karen Denman, Rogue River, OR, owns a bed and breakfast with her partner of six years.
Johanna Gangemi, Gold Hill, CO, is happily married and has a baby girl, Anya.
Marybeth Goodrich, Tacoma, is married with two kids and has a thriving piano lesson business while writing in her spare time.
John Hill, San Francisco, CA, and his wife Lani had their second daughter, Helen, on June 15, 1995.
Michael Holloman, Seattle, is teaching art and painting at Seattle University.
Kimberly Hoover, Olympia, is a beef, dairy replacement, pig, apple and berry farmer.
Kathleen Krzastek, Canton, GA, is still working on her Ph.D.
Victoria Lincoln, Tacoma, is manager of the local-government energy program for the Association of Washington Cities.
Lara McIntosh, Seattle, is doing Ethno Fitness full time.
Wilmer Melendez, Tacoma, is studying to be a registered nurse at Tacoma Community College.
Peter Miller, Burbank, CA, is a Hollywood film editor. Look for *The Nature of the Beast* in your local video store.
Kris Nelson, Salem, OR, says "Electric cars are here and affordable! Get off the barrel."
Maris Peach, Winsor, CA, recently moved. Her husband, Stuart, got a job in land preservation in Sonoma County.
Rodd Pemble, Bellingham, built a new house and his first baby, Jessie Marie, was born on February 17.
Beverly Reed, Olympia, is the mother of 5-year-old twins and a 9-year-old.
Mike Riley, Olympia, a former state representative, died at his home in Kelso on December 21, 1995 following a long struggle with brain cancer.
Avram Rips, Baltimore, MD, is happily married to Linda Dorf and has a 2-year-old daughter, Eliana.
Thomas Shackle, Anchorage, AK, is project manager of Fort Richardson Training Center.
Mark Shumaker, Tacoma, adopted a baby girl this year.
Cyndy Smith, Ellensburg, had a baby girl.
Edward Smith, Yelm, is writing a book, *Sparrows of the Lion*, about his experience with Aurora, the lion who lived with him for 15 years.
Victoria Smith, Ithaca, NY, says anyone in the Northeast can give her a call at (607) 272-7273.
Jeffree Stewart, Olympia, is a landscape painter and writer concerned with land and political issues.
Eve Tallman, Prescott, AZ, is a librarian at Prescott College.
Gerald Weeks, Olympia, writes "I still value my Evergreen experience more than any other part of my education."
Teresa Wocken-Linders, Renton, had another baby.
Lynne Yamamoto, New York, NY, is happily creating and showing her work in this country and in Europe.

1984

Brad Bodine, Lafayette, IN, received a Ph.D. in music composition from the University of Arizona. He is lecturer of music theory and 20th century music history at Purdue University and is the music coordinator at St. Thomas Aquinas, The Catholic Center at Purdue. He is married and has one daughter.

Linnea Tate, Seattle, has a baby girl, Emma, and is engaged to **Felix Rodriguez** '92.
Tami Trefethen, Seattle, (formerly Dylan Treall), lives in co-housing in West Seattle with her husband. They have a new baby named Cidra Elana.

Karla Urevig, Olympia, is in Evergreen's Masters in Teaching program and hopes to teach high school biology next year.
Sarah Vanucci, Olympia, works as a child/family therapist at the Community Mental Health Center in Shelton and is a political activist for the rights of children, gays and lesbians. She serves on the steering committee for Hands Off Washington in Thurston County.
Louise Westfall, Woodinville, is a mother of 3-year-old twins, a boy and a girl named Meadowsong and Wintersky.

1993

Sarah Amies, Seattle, will enter the masters in teaching program at Seattle University.
Gretchen Bakke, Bloomington, IN, completed oral hygiene school in Portland, Oregon in 1994 and with **Ross Farr** '92 is currently volunteering for B.R.U.S.H. Africa! in Kenya and Tanzania.
Patricia Blondo, Tillamook, OR, is a family advocate for Tillamook Headstart and is enjoying working for families. She hopes to attend graduate school in the fall and plans to study social work.
Sarah Bradley, Redmond, is a planner with the City of Kent and is on a citizen advisory committee for the City of Redmond. "I sure like telling people I went to Evergreen."
Robert Cockerham, Seattle, married Paula Schuerham Cockerham in August 1992. They have two sons, 2-year-old Harrison and 4-month-old Oliver.
David Coffing, Olympia, is trying to get in contact with **Alyssa Deutschler** '92 and Dominic Deleo. Please call the Alumni Office, (360) 866-6000 ext. 6551, if you know how to reach either of them.
Sandra Cortes, Brattleboro, VT, has been accepted for graduate studies at Antioch New England Graduate School. She is pursuing a master of education degree in elementary and early childhood education.
Richard Doss, Olympia, and his wife Maria have an 18-month-old daughter, Esther Bea.
Michelle Nicolls Drumheller, Alexandria, VA, was awarded an M.S. with an emphasis on community-based human services. She is also a full-time mom.
Wendi Dunlap, Seattle, created an Internet web page with links to other Evergreen alumni Web pages. The address is http://www.slumberland.com/tescalum.html. Check it out!
Pamela Evans, New Milford, CT, worked at the Atwater Kent Museum.
Natalie Harvey, Roy, and her husband have two children.
Beth Henshaw, Belfair, is general manager at Danson's Landscaping and plays violin for the Bremerton Symphony.
LeAnna Hutchinson, Pensacola, FL, is completing her master's degree in biology at the University of West Florida. This fall she will be studying ultraviolet damage to bacteria in Antarctica.
Tracy Malkin, Seattle, is teaching English in Chile.
Joseph McCanna, The Dalles, OR, is working for the Confederated Tribes of Warm Springs Hood River/Tilton Ladder Project to help re-establish the Hood River's spring Chinook run.
Mara Mulcahy, Anchorage, AK, is working on her M.S.W. at Smith College.
Samantha Nelson, Ellensburg, has been married for two years. She is working on certification in home and family life education, and will be teaching high school near Ellensburg.
Scott Nicolai, Ellensburg, is a habitat biologist for the Yakima Indian Nation. He misses his friends in Olympia and urges anyone in his neighborhood to stop by.
Donna Odom, Tacoma, is working toward her master's degree in applied behavioral science through the Leadership Institute of Seattle.
Gwen Orwiler, Sumner, is the new executive director for the Fair Budget Action Campaign in Seattle, an advocacy organization for low-income individuals.
Jennifer Pretare, Berkeley, CA, is working on her Ph.D. in entomology
Paul Slusher, Eugene, OR, is completing his masters thesis on "Healthcare and Rural Access during Doi Moi: Vietnam and Privatization" in the International Studies Department master's program at the University of Oregon and is a graduate teaching fellow. He will be engaging in a rural research internship in the Mekong Delta.
Lisa Thompson, Seattle, married James A. Rudnick on October 21 and is a photo lab technician with Lerner Processing Labs in Seattle.
Anna Villines, Portland, OR, says, "We need more Greeners in Portland!"
Annie Washington, Tacoma, is working on her Masters in Teaching.
Jason Weisfeld, Taos, NM, is pursuing his teaching certificate. He traveled in South America and Central America last year, working with street children in Colombia.
Cory Wilds, Kent, is performing with Blindspot, which has just released its second CD.
Lori Wilson, Eastsound, owns her own business, Inside Passages, which focuses on nature and meditation while sea kayaking in Alaska, Queen Charlotte Island and Puget Sound.
Adam Zuckerman, Philadelphia, PA, is a registrar in the currator's department at the Atwater Kent Museum.

1994

E. Carol Albers, Olympia, says, "Evergreen was one of the best experiences of my life!"
Andrew Blase, Olympia, is planning to attend the Institute of Theological Study at Seattle University.
Garrett Bosarge, Tacoma, graduated with a Masters in Teaching from City University and teaches science and math at Illahee Junior High School in Federal Way.
Judith Bridges, Federal Way, is studying her family history and can trace her roots back to past residents of Fort Nisqually in Point Defiance Park.
Michael Cobb, Olympia, who taught bicycle repair classes at Evergreen, is part of a bike rehabilitation program that would put community bicycles on the streets of Olympia for anyone to use.
Ruth Cowan, Lacey, is a vocal soloist and instructor and was a local producer of the West Coast Premiere of Sergei Tayenev's "Upon Reading A Psalm," performed in October, 1995.
Marcia Hanson, Graham, started Interconnection Import/Export, Inc. last year. She does business in South Africa.
Kristine Kalich, Issaquah, worked at the Issaquah Zoo and would like to work at Seattle's Woodland Park Zoo.
Amy Kiser, Olympia, plans to attend City College for her M.A. in educational psychology. She suggests people go to Ruby's Restaurant on the corner of 4th and Chestnut.
Carole Layton, Olympia, is expecting a baby this spring.
Andrea Mendoza, Norman, OK, is married to **Robert Williams** '93 and they have three children. She is a graduate student in drama at the University of Oklahoma and Robert is a second-year medical student.
John Piekarski, Tacoma, is the deputy managing editor for SportsLine USA, an internet sports information center.
Tiffany Thiele, Tumwater, has a baby boy, Nicholas.
Stacey Waterman-Hoey, Olympia, is working for the Washington State Energy Office and is president of the Energy Outreach Center in Olympia. She and her husband are on their way to Slovakia with the Peace Corps.
Dixie Wells, Longview, was promoted to corporal of the Longview Police Department.
Renee Young, Rochester, is a special education teacher.

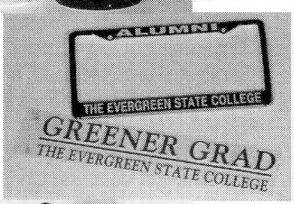
1995

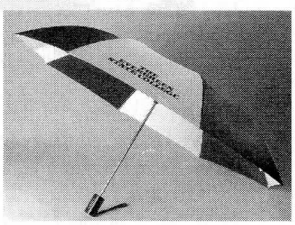
Shannon Adelhart, Portland, OR, runs the Froelick Adelhart Gallery.
Jessica Colleran, Chehalis, is a bilingual parole officer for the Department of Corrections.
Sarah Newton, Redmond, is a volunteer working with sea turtles in Hawaii.
Emily Vincent, St. Paul, MN, joined the Lutheran Volunteer Corps working at Habitat for Humanity.

Corrections

Elvira Bayless-Niedzialkowski '84, Oak Harbor, hasn't received her M.A. degree yet (as stated incorrectly in the last *ReView*). Next year she is taking a sabbatical in library science.
Michael Fraidenburg '91, Olympia, was listed in the last issue of the *ReView* as an Evergreen librarian. He is an executive assistant with the Washington Fish and Wildlife Commission and is married to Linda Fraidenburg, an Evergreen librarian.
Patricia S. Lott, Seattle, was incorrectly listed in the last *ReView* as Patricia Meessen.

GEOGEAR *for Greeners*





Order now! Proceeds from the sale of these items support alumni programming and your Alumni Association.

Evergreen logo sweatshirts and T-shirts

Show the world you're a Greener with a distinctive Evergreen alumni sweatshirt or tee (short-sleeved T-shirts). High quality, 100% cotton T-shirts and high-cotton content sweatshirts are available with the memorable Evergreen logo specially modified to show your alumni status. See order form for color choices.

Geoduck T-shirt

This 100% cotton, short-sleeved T-shirt features a special geoduck design created by an alum. Oxford gray shirt with five-color, screened geoduck design.

Cotton canvas baseball cap

What Greener is complete without a hat to top off the look? Canvas baseball cap has the Evergreen logo embroidered in green. Off-white with green bill. Limited quantities available.

Ceramic mugs

Suitable for everything from cappuccino to clam nectar. Two styles are available. The Evergreen-logo version is green with the logo etched into the mug. Also available, the alumni geoduck design appears in full color on a white mug. Mugs are dishwasher safe, microwave safe.

Car license plate holder

"Alumni" on top and "The Evergreen State College" on bottom. Yin and yang for the automotive set.

Window decal

New design — green lettering on clear sticker.

Key Rings

Round, lucite with laser-etched Evergreen logo. Green leather key chain/ID holder.

New Item! Umbrella

The seemingly omnipresent Northwest precipitation calls for a gargantuan Greener umbrella. Whether you're near or far from the rainy Olympia skies, keep your green-and-white TESC umbrella handy to keep spring showers at bay and to show the world you're a Greener. This nylon umbrella folds to a convenient 18 inches, and with the touch of its auto-open button, expands to a spacious 45 inches in diameter.
