Project Description (140 words or less)

We are organizing the 2nd annual TEDx Conference (an independently organized TED event) on The Evergreen State College campus for faculty, staff, and students. The goal of the conference is to continue on last year's success of the climate change topic with a conference on innovative solutions to climate change impacts. We hope through this conference to convey ideas, concepts, & information of solutions to climate change while inspiring faculty and students to engage with or explore the innovations.

We already have a substantial pledge of assistance from Media Services, who have offered their staff time at no cost to the event.

Timeline

The Event will be held on February 25th in the afternoon on campus. Call for proposals from presenters has been sent out and their applications are due on January 4th. The TEDx Coordinating Committee will meet on January 9th to evaluate proposals and decide speakers. Speakers will be notified on January 14th.

Metrics

Attendance will be measured at the request of the TED organization for the event. After the event is held the audience has the option to participate in a survey provided by the TED organization to help analyze the event for future years.

Areas affected by proposed project

Prior to a full review by the Clean Energy Committee, all grants must receive preliminary approval from the campus area to be responsible for the administration and oversight of the grant. Please refer to the call for applications for help identifying the area of best suited for oversight of your project. If you have further questions regarding areas affected by your project please contact the coordinator at cleanenergy@evergreen.edu. Be sure to allow yourself enough time to communicate with staff and faculty before the deadline. When preliminary approval is received, please have the affected area submit an e-mail of support for your proposal.

Affected Area	Approval Required	Approval Received

Sustainability (140 words or less)

The purpose of this event is to bring inspirational stories to the campus community about working solutions or innovations designed to either mitigate or adapt to climate change impacts. We also intend to provide opportunities for connections between community members and regional organizations to help students, faculty, and staff become proactive in climate change solutions and outreach opportunities. This event will also be built into the curriculum of some academic programs on sustainability.

Six faculty, five staff, and three students are involved in the planning for this year's event. Several other faculty and staff have expressed their support and appreciation for another TEDx this year.

Continuity (140 words or less)

Follow up events will be held on campus in academic programs and student groups in the form of seminars and event screenings at the SYNERGY event. This event helps to reach out across many disciplines to get the campus involved & thinking about sustainable solutions to climate change. This grant request is unique to the 2013 TEDx event at Evergreen. Future TEDx events may or may not request Clean Energy funding for each unique event.
