printmaking challenges

choose between 2 and 5 of the challenges listed below. In addition to selections you make from the list below, you can invent your own conceptual challenges. On the right, explain why you chose each item and what you intend to do in terms of scope{# of prints, size, format, media, depth of your interest in the idea, and so on}; also list any concepts that you come up with on your own. ¶Your choices are open to change and evolution, but the expectation is that, as part of your printmaking credits for Fall quarter, you will have completed approximately 15 hours of work on conceptual challenges, regardless of their success). Notice that some of the challenges below will tend to require the production of multiple pieces, while oth $ers may only require a single final product (though many drafts may lead up to that final piece). <math>\dagger Keep \ ev$ erything from your printmaking process, including sketches, make-ready prints, abandoned ideas, and so on.

I • represent a new system or mythology to classify plants	#	
2• represent a new hierarchy of living things		
3• create a "web of energy" - a mythology of how living sys-		
tems are interconnected
