Goliath Connect to Evergreen's student file server using Goliath

Goliath is an application that allows Mac OS X users to remotely upload and download files from Evergreen's file servers. Goliath is an Open Source project and is free to download and use.

- Download Goliath from http://www.webdav.org/goliath/ and copy the application folder into your Applications Folder
- 2. Launch Goliath
- 3. enter the URL of the student files server: studentfiles.evergreen.edu

URL: studentfiles.evergreen.edu
User Name: greima05 Passvard:
Advanced Settings

- 4. enter your Evergreen username and password (see below)
- 5. click OK
- 6. Navigate to your program's shared directory in the Programs folder OR your individual directory located under the lettered directory corresponding to the

first letter of your login (or lastname).

 You can now use Drag and Drop in the Goliath window to copy files back and forth between

			10.52	67 itema
