

SOS 2009-2010  
Student Background and Interest Check

SOS is a year long program that involves both advanced Computer Science topics and a significant programming project. Students should have a strong Computer Science background (Data to Information or equivalent), should be interested in pursuing advanced technical work, and should be motivated to work intensively on a project (either in a group or individually).

1. What is your academic background? List classes and programs you have taken, both at Evergreen and elsewhere, that contribute to your preparation for SOS.
2. What are your technical interests (both in computer science and in applications domains)?
3. What technical areas do you think you need to work on?
4. What do you want to accomplish in SOS this year?
5. Please describe a program, project, or application that you participated in. What was the nature of your involvement? What did you find significant about this work? What did you learn?

Please submit the answers to these questions by email to [sherri@evergreen.edu](mailto:sherri@evergreen.edu).

Thanks, and I hope I see you next year!
