Working with fonts

Finding and downloading fonts

You may find that the fonts installed on the system your working on are not adequate. There are many freely available fonts available to legally download and use from the internet. One good site is www.dafont.com

Installing Fonts in Mac OSX

1. Once you've downloaded and unzipped your font all you need to do to install it is copy it over to Macintosh HD/Users/Guest/Library/Fonts

2. Your new font should now be available to use in InDesign
