

Audio Recording 01 Assignment 3

1. How many echo sends are on the API 1604?
2. Do you want the foldback send to be pre fader or post fader?
3. Which outputs of the Mackie mixer are normalized to the API?
4. How can you monitor the CD recorder on the API without patching?
5. What are the 3 heads on a professional tape deck and in what order are they from left to right?
6. Explain one of the two main differences between using the submaster assign buttons vs the pan assign button?
7. What happens when you monitor off of the record head while recording overdubs?
8. If you adjust an EQ on the Mackie mixer will it affect the recording?
9. Since there are only four busses on the API mixers, what additional outputs would you use if you need to record eight tracks simultaneously?
10. Does pressing a Solo button on an input module affect the bus outputs of the API?
