

Date & Time: 11/4/08, 1:30-2:30 pm

Those Present: Cody Bonney, Jamie Bown, and Linda Sok (taking minutes).

Notes on Discussion:

- We decided on a project: HTML parser with NLTK.
- We decided not to accept any new members.
- We talked about the project and made an outline of things we hope to accomplish by the end of the week.
- We're interested in developing a program that finds, extracts, and stores information that can be uploaded to a server. This means we have to:
 - Buy a website domain.
 - Create users.
 - Write a web-crawler that strips HTML documents.
 - Use python's NLTK library to parse HTML documents of useful information.
 - Upload new information to server.
- We discussed using our program's materials as references.
- Cody volunteered to buy a domain by this week.
- We scheduled days to meet (Thursdays after labs from 12-3pm).
- Proposal is due on Friday. We plan on meeting on Thursday after class to make decisions and write up the proposal.

Agenda for Next Meeting:

- Collaborate on ideas and finish proposal.
- Think about a web domain name.
- List out references.
- Type up today's minutes.

To Do Before Next Meeting:

- Find more references.
- Work on proposal drafts.
- Think about a web domain name.
- Work on program outlines.

Next Meeting: 11/6/08, 12-3pm, Computer Center
